

1. The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

2. The second step is to gather information. This includes looking at the data, talking to the people involved, and researching the problem.

3. The third step is to analyze the information. This involves looking for patterns, identifying the root cause, and determining the scope of the problem.

4. The fourth step is to develop a solution. This involves brainstorming ideas, evaluating the options, and choosing the best one.

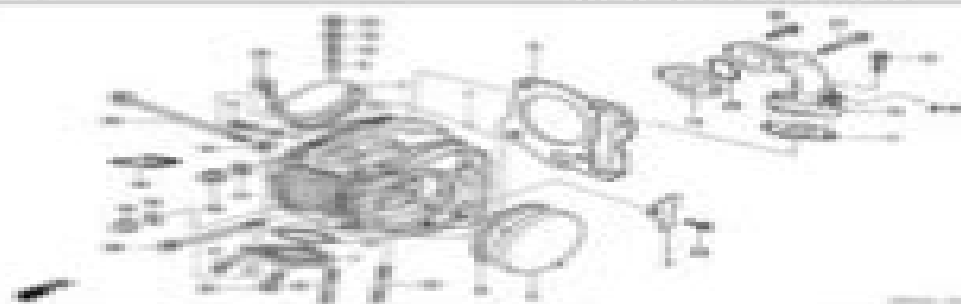

5. The fifth step is to implement the solution. This involves putting the plan into action, monitoring the progress, and making adjustments as needed.

6. The sixth step is to evaluate the results. This involves looking at the data, talking to the people involved, and determining if the problem has been solved.

7. The seventh step is to document the process. This involves writing a report, creating a manual, and sharing the information with others.

8. The eighth step is to review the process. This involves looking at the results, identifying areas for improvement, and making changes as needed.
