

CONTROL FUNCTIONS

① Graphic Equalizer Controls

The graphic equalizer consists of four stages with center frequencies of 250, 600, 1200 and 2400Hz. Adjust the controls in the positive(+) direction to emphasize your voice at the respective frequencies. For example, to increase the high frequency components of a bassy voice, move the 1200 and 2400Hz controls in the + direction.

② Output Level Control

Rotate this control clockwise to increase the output level. Adjust for the correct output(refer to item 8).

③ Compressor and Equalizer On/Off Switch

Slide the switch to COMP to apply power to the compressor circuit. Slide the switch to EQUALIZER ON to activate the GRAPHIC EQUALIZER controls.

④ Power Indicator

The red LED lights when the POWER switch is turned ON. In addition, the LED blinks in the transmit condition when the PTT or LOCK switches are depressed.

⑤ Compression Level Switch

Three different values of speech compression can be selected.

HIGH: The compressor amplifier gain is approximately 45dB. Select this position for soft voices or while speaking far away from the microphone. Note that background noise may also be picked up when using this higher gain position.

MED: The compressor amplifier gain is approximately 35dB. This is the normal operating position. Maintain a distance of about 10cm(4 inches) from the microphone while speaking.

LOW: The compressor amplifier gain is approximately 10dB. The compression action is only noticeable while speaking with a loud voice. Normal voice levels do not trigger the compressor.

⑥ PTT Switch

To transmit, push this switch and speak into the microphone. The red LED power indicator blinks while this switch is held down. Release the switch to return to the receive mode.

⑦ Lock Switch

Push this switch once to lock the transmitter in the transmit mode. The red LED power indicator blinks while in the transmit mode. Push the PTT switch to release the lock function and return to the receive mode.

⑧ Output Level Indicator

This meter monitors the output level from the SM-10. Adjust the OUTPUT LEVEL control for a 0dB meter reading on the top scale.

⑨ Up Switch

⑩ Down Switch

Each push increases or decreases the operating frequency. Holding the switch down causes the transceiver to step continuously through frequencies.

⑪ Microphone Element

The SM-10 uses a sensitive, uni-directional condenser microphone element to produce the clearest audio signal possible.

The Archaeologist's Manual for Conservation Bradley A. Rodgers,2007-05-08 This is a Foreword by an archaeologist not a conservator but as Brad Rodgers says Conservation has been steadily pulled from archaeology by the forces of specialization p 3 and he wants to remedy that situation through this manual He sees this work as a call to action for the non professional conservator permitting curators conservators and archaeologists to identify artifacts that need professional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using simple non toxic procedures p 5 It is the mission of Brad's manual to bring conservation back into archaeology p 6 The degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say because as he says The conservationist archaeologist is responsible to make preparation for an artifact's care even before it is excavated and after its storage into the foreseeable future a tremendous responsibility p 10 The manual is a combination of highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone organics and composites a far better guide to artifact conservation than was available to me when I first faced that archaeological challenge at colonial Brunswick Town North Carolina in 1958 a challenge still being faced by archaeologists today The stage of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual conservation has indeed made great progress For instance a common procedure then was to heat the artifacts red hot in a furnace a method that made me cringe

Disaster Management for Libraries and Archives John Feather,2017-03-02 Disaster planning might not seem a pressing concern until disaster strikes

Recent events have reminded us that any collection or service may be at risk and libraries and archives must have prevention and recovery measures in place. Written by academics and practitioners drawing on firsthand experience and research worldwide including Australia, Scandinavia and the USA, *Disaster Management for Libraries and Archives* reviews and explains the importance and scope of disaster management planning and what can be done before, during and after incidents. The book begins by explaining how to develop a disaster control plan, outlining the different phases from prevention to recovery and goes on to provide guidance on risk assessment and management methods which should underpin disaster planning. Individual chapters then focus on fire and flooding, bringing together lessons learned from recent disasters in the UK with case study material including information on prevention systems and reaction and recovery measures. A chapter on cooperative projects in the USA follows, providing examples of how collaborative partnerships and networks can be organized so that help, expertise and resources can be shared to facilitate management of disasters. The effect on people, both employees and users, must never be overlooked; this is the emphasis of the second half of the book. Research on the impact of a major library fire in Sweden forms the basis of the next chapter, which explains how the psychological impact of disasters on both staff and the local community can be managed. The following chapter describes the devastating effects on cultural institutions and their staff of war in Croatia in the early 1990s and extraordinary achievements against the odds. Ways of maintaining immediate temporary service continuity along with planning for long term restoration of services are exemplified by a case study of the fire at the Central Library of Norwich. *Disaster Management for Libraries and Archives* offers advice and insight for managers beginning to work on or reviewing disaster management within their organizations. The accounts of actual events highlight the real life challenges faced and the effectiveness of appropriate solutions, while the guide to information sources at the end of the book signposts readers to a wealth of other useful material.

Museum Lighting David Saunders, 2021-01-12 This indispensable guide to museum lighting, written by distinguished conservation scientist David Saunders, is the first new volume of its kind in over thirty years. Author David Saunders, former keeper of conservation and scientific research at the British Museum, explores how to balance the conflicting goals of visibility and preservation under a variety of conditions. Beginning with the science of how light, color and vision function and interact, he proceeds to offer detailed studies of the impact of light on a wide range of objects including paintings, manuscripts, textiles, bone, leather and plastics. With analyses of the effects of light on visibility and deterioration, *Museum Lighting* provides practical information to assist curators, conservators and other museum professionals in making critical decisions about the display and preservation of objects in their collections.

Disaster Management in Archives, Libraries and Museums Graham Matthews, Yvonne Smith, 2016-12-05 This important book assesses the current state of disaster management in archives, libraries and museums in the UK and around the world and provides recommendations for addressing current and future threats. Following an introductory outline of the topic and terminology, the authors provide a short history of the development of disaster

management in the cultural heritage sector They illustrate a basic framework for effective disaster management by reviewing disaster control plan practice from around the world Through examining and identify the key issues affecting disaster management in archives libraries and museums the authors discuss a priority structure for future implementation This book will be key reading for scholars and students of archive studies library and information and museum management It will also be extremely useful for professionals and policy makers involved in disaster management planning at a local and national level

Ham Radio ,1990 *Connecting Museums* Mark O'Neill, Glenn Hooper, 2019-10-16 *Connecting Museums* explores the boundaries of museums and how external relationships are affected by internal commitments structures and traditions Focusing on museums relationship with health inclusion and community the book provides a detailed assessment of the alliances between museums and other stakeholders in recent years With contributions from practitioners and established and early career academics this volume explore the ideas and practices through which museums are seeking to move beyond what might be called one off contributions to society to reach places where the museum is dynamic and facilitates self generation and renewal where it can become not just a provider of a cultural service but an active participant in the rehabilitation of social trust and democratic participation The contributors to this volume provide conceptual critiques and clarification of a number of key ideas which form the basis of the ethics of museum legitimacy as well as a number of reports from the front line about the experience of trying to renew museums as more valuable and more relevant institutions Providing internal and external perspectives *Connecting Museums* presents a mix of applied and theoretical understandings of the changing roles of museums today As such the book should be of interest to academics researchers and students working in the broad fields of museum and heritage studies material culture and arts and museum management

Chemical Principles of Textile Conservation Agnes Timar-Balazsy, Dinah Eastop, 2012-09-10 *Chemical Principles of Textile Conservation* provides must have knowledge for conservators who do not always have a scientific background This vital book brings together from many sources the material science necessary to understand the properties deterioration and investigation of textile artefacts It also aids understanding of the chemical processes during various treatments such as cleaning humidification drying disinfestation disinfection and the use of adhesives and consolidants in conservation of historical textiles Textile conservators will now have ready access to the necessary knowledge to understand the chemistry of the objects they are asked to treat and to make informed decisions about how to preserve textiles The combination of a chemist and a conservator provides the perfect authorial team It ensures a unique dual function of the text which provides textile conservators with vital chemical knowledge and gives scientists an understanding of textile conservation necessary to direct their research The many practical examples and case studies illustrate the utility of the relatively large chemical introduction and the essential chemical information which is included The case studies many illustrated in colour range from the treatment of the Ghandis clothes high altitude flying suits and a Mary Quant raincoat to the Hungarian Coronation
