Mining Software Engineering Data for Software Reuse Themistoklis Diamantopoulos, Andreas L. Symeonidis, 2020-03-30 This monograph discusses software reuse and how it can be applied at different stages of the software development process on different types of data and at different levels of granularity. Several challenging hypotheses are analyzed and confronted using novel data driven methodologies in order to solve problems in requirements elicitation and specification extraction, software design and implementation, as well as software quality assurance. The book is accompanied by a number of tools, libraries, and working prototypes in order to practically illustrate how the phases of the software engineering life cycle can benefit from unlocking the potential of data. Software engineering researchers, experts, and practitioners can benefit from the various methodologies presented and can better understand how knowledge extracted

from software data residing in various repositories can be combined and used to enable effective decision making and save considerable time and effort through software reuse Mining Software Engineering Data for Software Reuse can also prove handy for graduate level students in software engineering Business Process Management Marcello La Rosa, Peter Loos, Oscar Pastor, 2016-09-18 This book constitutes the proceedings of the 14th International Conference on Business Process Management BPM 2016 held in Rio de Janeiro Brazil in September 2016 The focus of the conference covers a range of papers focusing on automated discovery conformance checking modeling foundations understandability of process representations runtime management and predictive monitoring The topics selected by the authors demonstrate an increasing interest of the research community in the area of process mining resonated by an equally fast growing uptake by different industry sectors **Research in Attacks, Intrusions, and Defenses** Marc Dacier, Michael Bailey, Michalis Polychronakis, Manos Antonakakis, 2017-10-10 This book constitutes the refereed conference proceedings of the 20th International Symposium on Research in Attacks Intrusions and Defenses RAID 2017 held in Atlanta GA USA in September 2017 The 21 revised full papers were selected from 105 submissions They are organized in the following topics software security intrusion detection systems security android security cybercrime cloud security network security **Social Informatics** Steffen Staab, Olessia Koltsova, Dmitry I.
