**Universities, Sustainability and Society: Supporting the Implementation of the Sustainable Development Goals** Walter Leal Filho, Amanda Lange Salvia, Luciana Brandli, Ulisses M. Azeiteiro, Rudi Pretorius, 2021-05-03 In order to yield the expected benefits sustainability initiatives need to be undertaken by means of a close cooperation between universities on the one hand and societal partners on the others The principle of co creation and co execution of sustainability initiatives increases the value for all by mutual learning and the sharing of expertise and resources But pursuing sustainability initiatives with a community and societal involvement is not simple There is a perceived need for a better understanding of how universities can interact with society in order to support the implementation of the UN Sustainable Development Goals This book is an attempt to address this need by a novel approach which focuses on current potentials and challenges across a wide range of fields and expertise The book focuses on how the theory and practice of sustainable development interact and shows the need for a continuation of the dialogue among sustainability academics and practitioners so as to address the issues matters and problems at hand The spectrum of themes addressed on this book also entails how environmental values and ethics are applied and the relationship between social biological and cultural diversity It also includes a broad disciplinary approach to sustainability including education research and case studies and the links with human environment relations in a sustainable development context *Amongst Mathematicians* Elena Nardi, 2008 This book offers a unique perspective on ways in which mathematicians perceive their students learning teach reflect on their teaching practice Elena Nardi achieves this by employing two fictional yet entirely data grounded characters to create a conversation on these important issues The construction of these characters is based on large bodies of data including intense focused group interviews with mathematicians and extensive analyses of students written work collected and analyzed over a substantial period

**Enhancing Primary Mathematics Teaching** Ian Thompson, 2003-09-16 This book is the third in an important trilogy of edited collections on the teaching and learning of primary mathematics To each book the editor Ian Thompson has attracted a team of expert contributors and himself set the characteristically high standard of writing and clarity When in 10 or 20 years time people want to know about the state of English primary mathematics at the turn of the 21st century they will turn to this volume You would do well to read it now Mathematics in Schools This is the third book in the popular series edited by Ian Thompson that brings together an impressive array of contributing authors Current issues are discussed in an informed but concise way that makes research accessible to the wider community of mathematics educators Julia Anghileri University of Cambridge This book explores the effect that the National Numeracy Strategy and its successor the Primary Strategy have had on the way in which mathematics is taught in primary schools Prominent contributors examine the Strategies recommendations from the perspective of their own research areas or interests and discuss the issues involved including Ideas for extending current practice Suggestions of important aspects of

mathematics teaching that are being given little or no emphasis Alternative approaches that could be integrated into current practice Aspects of current practice that need to take account of recent research findings or emerging issues Each chapter discusses implications for teaching and learning primary mathematics The book will be particularly useful for trainees practising teachers mathematics coordinators and numeracy consultants Contributors Mundher Adhami Mike Askew Carol Aubrey Margaret Brown Ann Dowker Rosemary Hafeez Steve Higgins Keith Jones Lesley Jones Valsa Koshy Alison Millett Claire Mooney Laurie Rousham Malcolm Swan Ian Thompson Helen J Williams

**Does Religious Education Work?** James C. Conroy, David Lundie, Tony Gallagher, Karen Wenell, Kevin Lowden, 2013-12-19 The most comprehensive empirical and conceptual analysis of the state of religious education in British schools currently available *Adolescent Romantic Relationships as Precursors of Healthy Adult Marriages* Benjamin R. Karney, 2007 Policymakers are interested in promoting healthy marriages in adulthood by providing services to strengthen the adolescent precursors of healthy marriage especially within low income populations But if programs and curricula targeting adolescent romantic relationships are to be effective they must be grounded in an accurate understanding of how adolescent relationships function and the role that they play in the development of healthy adult marriages This report evaluates the current landscape of theory research and interventions addressing the role of adolescent romantic relationships in the development of healthy adult marriages Drawing on a thorough review of the existing theoretical and empirical literature in this area as well as interviews with practitioners directly involved with developing or administering relationship education to adolescents the authors bring together relevant research and theory from a wide range of disciplines that have examined these issues and suggest future directions for research and intervention In particular they note that although research describing romantic relationships in low income populations is sparse there are already existing nationally representative data sets that include data from substantial numbers of well sampled low income adolescents Analyses of these data would have relatively low cost and a potentially high yield for informing policies that target low income youth

**Primary ICT: Extending Knowledge in Practice** John Duffy, 2006-08-15 Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching This book addresses this building on the core subject knowledge covered in the Achieving QTS series and relating it to classroom practice It supports trainees in extending and deepening their knowledge of ICT and demonstrating how to apply it to planning and implementing lessons Practical and up to date teaching examples are used to clearly contextualize subject knowledge A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies

**We Reason & We Prove for ALL Mathematics** Fran Arbaugh, Margaret (Peg) Smith, Justin Boyle, Gabriel J. Stylianides, Michael Steele, 2018-08-08 Sharpen concrete teaching strategies that empower students to reason and prove What does reasoning and proving instruction look like and how can teachers support students capacity to reason and prove Designed as a learning tool for mathematics teachers in grades 6 12

this book transcends all mathematical content areas with a variety of activities for teachers that include Solving and discussing high level mathematical tasks Analyzing narrative cases that make the relationship between teaching and learning salient Examining and interpreting student work Modifying curriculum materials and evaluating learning environments to better support students to reason and prove No other book tackles reasoning and proving with such breath depth and practical applicability

**From Text to 'Lived' Resources** Ghislaine Gueudet, Birgit Pepin, Luc Trouche, 2011-09-06 What kinds of curriculum materials do mathematics teachers select and use and how This question is complex in a period of deep evolutions of teaching resources with the proficiency of online resources in particular How do teachers learn from these materials and in which ways do they tailor them for their use and pupil learning Teachers collect resources select transform share implement and revise them Drawing from the French term *ing nerie documentaire* we call these processes documentation The literal English translation is to work with documents but the meaning it carries is richer Documentation refers to the complex and interactive ways that teachers work with resources in class and out of class individually but also collectively
