

Map Skills for Today: Maps Across America

Teaching Notes

About the Book

Map Skills for Today presents comprehensive map skills instruction and practice linked to the social studies curriculum. This student practice book, *Maps Across America*, helps build students' geographical literacy about the United States. In this book, students will locate and learn key facts about each country. They will also learn and apply skills such as using latitude and longitude, reading thematic maps, and comparing maps.

The questions in this book are organized into four different levels of activities.

Use Your Skills

This activity feature asks students to practice interpreting maps and finding specific information. The types of questions asked are finding maps throughout the student practice book. They may include multiple choice, fill-in-the-blank, and short answer questions. This feature appears to discuss every lesson in the book.

Map It!

This interactive feature asks students to engage directly with a map. Activities invite students to mark maps with symbols and labels, identify, applying the skills they have learned.

Think It Over

This activity feature asks students to think critically about the maps they have studied and the text they have read. It may require students to compare two different maps or ideas, to make connections between various pieces of information, or to make educated guesses based on what they have learned.

Your Turn Now

This feature asks students to complete a project that they create yourself. It often expands the lesson by asking students to apply their skills beyond the original topic. Activities in this feature are ideal for independent work, assignments, and homework.

Using the Student Practice Book

Step 1: Introduce the Topic

Before students start the book, spend some time building background on key topics: different kinds of maps, using the globe, and using maps. Use the following questions and activities to guide discussion and help students understand and appreciate maps.
