The threshold (minimum mark) for B is set halfway between those for Grades A and C. The threshold (minimum mark) for D is set halfway between those for Grades C and E. The threshold (minimum mark) for G is set as many marks below the F threshold as the E threshold is above it. Grade A* does not exist at the level of an individual component.

The thresholds for the **syllabus** are determined first by adding together the thresholds for the components taken by the candidate. A reduction may be made at the higher grades depending on the correlation of the papers. If the maximum raw marks for the components are not in the weighting/relationship specified in the syllabus, a weighting is applied to arrive at the overall thresholds. The A* threshold is calculated using the difference between A and B as a starting point.

June 2013 Paper 1 physics 0625:

Whose Public Space? Ali Madanipour, 2010-01-21 Public spaces mirror the complexities of urban societies as historic social bonds have weakened and cities have become collections of individuals public open spaces have also changed from being embedded in the social fabric of the city to being a part of more impersonal and fragmented urban environments Can making public spaces help overcome this fragmentation where accessible spaces are created through inclusive processes This book offers some answers to this question through analysing the process of urban design and development in international case studies in which the changing character level of accessibility and the tensions of making public spaces are explored The book uses a coherent theoretical outlook to investigate a series of case studies crossing the cultural divides to examine the similarities and differences of public space in different urban contexts and its critical analysis of the process of development management and use of public space with all its tensions and conflicts While each case study investigates the specificities of a particular city the book outlines some general themes in global urban processes It shows how public spaces are a key theme in urban design and development everywhere how they are appreciated and used by the people of these cities but also being contested by and under pressure from different stakeholders *Alloys Index*, 1993
