

G50UHi Series Units

G50UHi series units are mid-efficiency gas furnaces used for upflow or horizontal applications only, manufactured with Lennox Duralok Plus® heat exchangers formed of aluminized steel. G50UHi units are available in heating capacities of 66,000 to 154,000 Btuh and cooling applications up to 5 tons. Refer to Engineering Handbook for proper sizing.

Units are factory equipped for use with natural gas. Kits are available for conversion to LPG operation. G50UHi model units are equipped with the Lennox SureLight® silicon nitride ignition system and blower control module. The blower control module allows the G50UHi to maintain a constant CFM over a wide range of operating static pressure. All units use a redundant gas valve to assure safety shut-off as required by C.S.A.
