## CHEMICAL AND PHYSICAL CHANGES

In a chemical change, a chemical reaction occurs and new products form. Energy is either absorbed or released. In a physical change, matter changes form, but its identity is not changed.

Identify each change as chemical or physical.

|    |                                                                            |  |
|----|----------------------------------------------------------------------------|--|
| 1  | Heating water into steam                                                   |  |
