As a presidential candidate Barack Obama criticized the George W Bush administration for its unrestrained actions in matters of national security In secret Justice Department memos President Bush s officials had claimed for the executive

branch total authority to use military force in response to threats of terrorism They set aside laws made by Congress even criminal laws prohibiting torture and warrantless surveillance Candidate Obama promised to restore the rule of law and make a clean break with the Bush approach President Obama has not done so Why In a thorough comparison of the Bush and Obama administrations national security policies Chris Edelson demonstrates that President Obama and his officials have used softer rhetoric and toned down legal arguments but in key areas military action surveillance and state secrets they have simply found new ways to assert power without meaningful constitutional or statutory constraints Edelson contends that this legacy of the two immediately post 9 11 presidencies raises crucial questions for future presidents Congress the courts and American citizens Where is the political will to restore a balance of powers among branches of government and adherence to the rule of law What are the limits of authority regarding presidential national security power Have national security concerns created a permanent shift to unconstrained presidential power

their movements This approach enables policy makers to distinguish between different types of movements and to design migration policies for each International cooperation will be critical to the effective management of migration

**Criminal Punishment and Human Rights: Convenient Morality** Adnan Sattar,2019-03-05 This book examines the relationship between international human rights discourse and the justifications for criminal punishment Using interdisciplinary discourse analysis it exposes certain paradoxes that underpin the International Bill of Human Rights academic commentaries on human rights law and the global human rights monitoring regime in relation to the aims of punishment in domestic penal systems It argues that human rights discourse owing to its theoretical kinship with Kantian philosophy embodies a paradoxical commitment to human dignity on the one hand and retributive punishment on the other Further it sustains the split between criminal justice and social justice which results in a sociologically ill informed understanding of punishment Human rights discourse plays a paradoxical role vis vis the punitive power of the state as it seeks to counter criminalisation in some areas and backs the introduction of new criminal offences and longer prison sentences in others The underlying priorities it is argued have been shaped by a number of historical circumstances Drawing on archival material the study demonstrates that the international penal discourse produced during the late nineteenth and early twentieth century laid greater emphasis on offender rehabilitation and was more attentive to the social context of crime than is the case with the modern human rights discourse

**Neoliberalism, State-Corporate Power and Regulatory Failure** Rhiannon Bandiera, 2025-05-23 Based on over a decade of research this book examines the social harms of Australian prescription and non prescription medicine regulation and how these ultimately stem from neoliberalism and its reinforcement of state and corporate power Neoliberalism shapes state and corporate power regulation and the harms resulting from regulatory failure yet the links between these themes are rarely discussed Drawing on the concept of

hegemonic neoliberal governmentality this book critically examines Australian medicine regulation and the harms resulting from its failure in areas such as medicine quality safety and efficacy direct to consumer advertising and marketing directed at health professionals It traces these harms through the colonial foundations and evolution of medicine regulation in Australia exploring both regulatory failure and the attempts at reforming this regulatory system It argues that neoliberalism is not regulatable and reinforces and sustains itself empowering the state and corporations while disempowering the public and those representing its interests Thus reducing its harms is only achievable through broader transformative change rather than by reforming and thereby continuing to work within the existing neoliberal capitalist system Neoliberalism State Corporate Power and Regulatory Failure will be of value to practitioners members of the public and private sector and academics active in the fields of state corporate and state corporate crime social harm and regulation as well as to those new to the study of medicine related harms It will also be of interest to all those concerned about their health and the medicines they use

McKinney,2020-07-17 For decades lesbian feminists across the United States and Canada have created information to build movements and survive in a world that doesn't want them In *Information Activism* Cait McKinney traces how these women developed communication networks databases and digital archives that formed the foundation for their work Often learning on the fly and using everything from index cards to computers these activists brought people and their visions of justice together to organize and provide access to information Focusing on the transition from paper to digital based archival techniques from the 1970s to the present McKinney shows how media technologies animate the collective and unspectacular labor that sustains social movements including their antiracist and trans inclusive endeavors By bringing sexuality studies to bear on media history McKinney demonstrates how groups with precarious access to control over information create their own innovative and resourceful techniques for generating and sharing knowledge      The World of States John L.

Campbell,John A. Hall,2015-02-26 This book is available as open access through the Bloomsbury Open Access programme and is available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com) For many years attention in both public and intellectual fields was concentrated on the benefits of civil society However with the demand for greater state regulation of the economy and the increasing realisation that states of the fourth world will never advance without the enforcement of a rule of law the tenor of debate is now changing This topical book offers a historical account of state forms in the 21st century It focuses on what makes states effective thus offering a different approach to existing literature which has tended to focus on the predatory characteristics of states The book covers all the major state forms of this century from the US and EU to India and China as well as a number of key failed states such as Iraq and Zimbabwe Key definitions and terms are clearly explained throughout Written leading figures in the field and addressing one of the key questions in politics today this is a much needed addition to the literature      **Comparative Criminology** Hermann Mannheim,2013-08-21 This is Volume II of fifteen in a series on the
