Webb, 1984 The Routledge International Handbook of Criminology and Human Rights Leanne Weber, Elaine Fishwick, Marinella Marmo, 2016-08-25 The Routledge International Handbook of Criminology and Human Rights brings together a diverse body of work from around the globe and across a wide range of criminological topics and perspectives united by its critical application of human rights law and principles This collection explores the interdisciplinary reach of criminology and is the first of its kind to link criminology and human rights This text is divided into six sections each with an introduction and an overview provided by one of the editors. The opening section makes an assessment of the current standing of human rights within the discipline Each of the remaining sections corresponds to a substantive area of harm prevention and social control which together make up the main core of contemporary criminology namely criminal law in practice transitional justice peacemaking and community safety policing in all its guises traditional and emerging approaches to criminal justice and penality both within and beyond the prison This Handbook forms an authoritative foundation on which future teaching and research about human rights and criminology can be built This multi disciplinary text is an essential companion for criminologists sociologists legal scholars and political scientists Nuremberg Military Tribunals and the Origins of International Criminal Law Kevin Jon Heller, 2012-10-11 This book provides the first comprehensive legal analysis of the twelve war crimes trials held in the American zone of occupation between 1946 and 1949 collectively known as the Nuremberg Military Tribunals NMTs The judgments the NMTs produced have played a critical role in the development of international criminal law particularly in terms of how courts currently understand war crimes crimes against humanity and the crime of aggression The trials are also of tremendous historical importance because they provide a far more comprehensive picture of Nazi atrocities than their more famous predecessor the International Military Tribunal at Nuremberg IMT The IMT focused exclusively on the major war criminals the Goerings the Hesses the Speers The NMTs by contrast prosecuted doctors lawyers judges industrialists bankers the private citizens and lower level functionaries whose willingness to take part in the destruction of millions of innocents manifested what Hannah Arendt famously called the banality of evil The book is divided into five sections The first section traces the evolution of the twelve NMT trials The second section discusses the law procedure and rules of evidence applied by the tribunals with a focus on the important differences between Law No 10 and the Nuremberg Charter The third section the heart of the book provides a systematic analysis of the tribunals jurisprudence It covers Law No 10 s core crimes crimes against peace war crimes and crimes against humanity as well as the crimes of conspiracy and membership in a criminal organization The fourth section then examines the modes of participation and defenses that the tribunals recognized The final section deals with sentencing the aftermath of the trials and their historical legacy Programs for Prevention Services Memo ,1998
