US-Chinese Strategic Triangles S. Mahmud Ali, 2017-06-07 This book reveals the nature of Sino-US strategic competition by examining the influence exerted by major secondary stakeholders e.g. Japan, Russia, India, the Koreans and ASEAN on the two powers, USA and its rival China, who consider each other as a source of greatest challenges to their respective interests. By adopting strategic triangles as the analytical framework and assessing triangular relational dynamics such as US-China, Japan or US-China-Russia, the author illustrates how secondary stakeholders advance their own interests by exploiting their respective linkages to the two rivals, thereby shaping Sino-US competitive dynamics. This work adds a regional and multivariable perspective to the understanding of the Indo-Pacific's insecurity challenges

Cyclescapes of the Unequal City John G. Stehlin, 2019-10-01 A critical look at the political economy of urban bicycle infrastructure in the United States. Not long ago, bicycling in the city was considered a radical statement or a last resort, and few cyclists braved the inhospitable streets of most American cities. Today, however, the urban cyclist represents progress and the urban renaissance. City leaders now undertake ambitious new bicycle infrastructure plans and bike share schemes to promote the environmental, social, and economic health of the city and its residents. *Cyclescapes of the Unequal City* contextualizes and critically examines this new wave of bicycling in American cities, exploring how bicycle infrastructure planning has become a key symbol of and site of conflict over uneven urban development. John G. Stehlin traces bicycling's rise in popularity as a key policy solution for American cities facing the environmental, economic, and social contradictions of the previous century of sprawl. Using in-depth case studies from San Francisco, Philadelphia, and Detroit, he argues that the mission of bicycle advocacy has converged with and reshaped the urban growth machine around a model of livable, environmentally friendly, and innovation-based urban capitalism. While advocates envision a more sustainable city for all, the deployment of bicycle infrastructure within the framework of the neoliberal city in many ways intensifies divisions along lines of race, class, and space. *Cyclescapes of the Unequal City* speaks to a growing interest in bicycling as an urban economic and environmental strategy, its role in the politics of gentrification, and efforts to build more diverse coalitions of bicycle advocates. Grounding its analysis in both regional political economy and neighborhood-based ethnography, this book ultimately uses the bicycle as a lens to view major shifts in today's American city

Production Management and Business Development Bohuslava Mihalčová, Petra Szaryszová, Lenka Štofová, Michal Pružinský, Barbora Gontkovičová, 2018-12-07 Trends in economic development rely on increasing human knowledge, which stimulates the development of new sophisticated technologies. With their utilization, production is raised, and the intent is to decrease natural resources consumption and protect and save our life environment as much as we can. At the same time, increasing pressure is observed both from competition and customers. The way to be

competitive is by improving manufacturing and services offered to the customer These are the major challenges of contemporary enterprises Organizations are improving their activities and management processes This is necessary to manage the seemingly intensifying competitive markets successfully Enterprises apply business optimizing solutions to meet new challenges and conditions This way ensuring effective development for long term competitiveness in a global environment This is necessary for the implementation of qualitative changes in the industrial policy Process Control and Production Management MTS 2018 is a collection of research papers from an international authorship The authors present case studies and empirical research which illustrates the progressive trends in business process management and the drive to increase enterprise sustainability development **Federal Reserve Oversight** United States.
