

Answer the following questions in your own words using the textbook as your resource. Answer with complete sentences.

1. Use the following terms in sentences that explain the relationship between the terms:
- a. genes
 - b. alleles

Explain each response with regard to differences in frequency of different genes within a population and how it is associated with each allele.

2. Use the following terms in sentences that explain the relationship between the terms:
- a. evolution
 - b. trait
 - c. variation

Explain each response with regard to how each term is influencing the other and its frequency. May not use about genetic drift in evolution. What events have caused for it sometimes? Give an example from your own life. ~~Explain each term with a personal example or situation. Explain the relationship.~~

3. What are the five elements of geography? Why are they important?

The five elements of geography are location, place, region, movement, and human-environment interaction. They are important because they are geographic tools that help us understand people in culture, environment, and their behavior.

4. What are the different characteristics of genes and traits?

Genes are a segment of DNA that codes for a trait. They are the basic units of heredity and are passed from parent to offspring. Traits are the characteristics of an organism that are determined by genes. They can be physical, behavioral, or biochemical. Genes and traits are related because genes are the instructions for making proteins, which then determine the traits of an organism. ~~Explain each term with a personal example or situation. Explain the relationship.~~

5. What is the difference between a gene and a trait? Why are they important?

A gene is a segment of DNA that codes for a trait. A trait is a characteristic of an organism that is determined by a gene. Genes are important because they are the instructions for making proteins, which then determine the traits of an organism. Traits are important because they are the characteristics that we can observe and measure.

6. How do genes and traits relate to each other?
