Microarrays, Part A: Array Platforms and Wet-Bench Protocols ,2011-08-19 Modern DNA microarray technologies have
evolved over the past 25 years to the point where it is now possible to take many million measurements from a single
experiment These two volumes Parts A B in the Methods in Enzymology series provide methods that will shepherd any
molecular biologist through the process of planning performing and publishing microarray results Part A starts with an
overview of a number of microarray platforms both commercial and academically produced and includes wet bench protocols
for performing traditional expression analysis and derivative techniques such as detection of transcription factor occupancy
and chromatin status Wet bench protocols and troubleshooting techniques continue into Part B These techniques are well
rooted in traditional molecular biology and while they require traditional care a researcher that can reproducibly generate
beautiful Northern or Southern blots should have no difficulty generating beautiful array hybridizations Data management is
a more recent problem for most biologists The bulk of Part B provides a range of techniques for data handling This includes
critical issues from normalization within and between arrays to uploading your results to the public repositories for array
data and how to integrate data from multiple sources There are chapters in Part B for both the debutant and the expert
