

SALVIA

WHAT IS IT

Salvia divinorum, commonly known as salvia, is a plant that is native to South and Central America. When it is chewed, smoked, or brewed into a tea it produces psychoactive effects. In its native countries, the plant is used in spiritual ceremonies and practices.

Salvia may be referred to by several different street names, such as:

- Sage of the seers
- Diviner's mint
- Diviner's sage
- Sally-D

SALVIA ABUSE

Salvia usually comes in the form of a green plant, however, it comes in the form of a tea in most spiritual practices. When abused, people will typically smoke or chew the dried leaves.

People who smoke the drug report a short-lived high that is somewhat similar to, but more intense than, **marijuana**.

The effects of salvia may last for up to 20 minutes when smoked

People who swallow salvia, on the other hand, may experience visual hallucinations.

The effects of salvia may last for 1-2 hours if swallowed

Side Effects of Drugs Annual was first published in 1977. It has been continually published since then as a yearly update to the voluminous encyclopedia Meyler's Side Effects of Drugs. Each new Annual continues to provide clinicians and medical investigators with a reliable and critical yearly survey of new data and trends in the area of Adverse Drug Reactions and Interactions. An international team of specialists has contributed to the informatics by critically interpreting it and by pointing to whatever is misleading. Provides a critical yearly survey of new data and trends in the side effects of drugs. Each drug article contains case histories. Contains detailed information on drug-drug interactions.

Herbs and Nutrients for the Mind Chris D. Meletis, Jason E. Barker, 2004-10-30 Two naturopaths introduce us to the world of brain biochemistry translating the science into laymen's terms so that the reader can understand the potential power of herbs and nutrients to enhance health, prevent disorders and affect existing health disorders. These alternatives or supplements to medication are being used across the country to help treat health conditions with a psychological component from ADHD and anorexia to insomnia, menopause and Parkinson's Disease. Authors Meletis and Barker explain 18 of these conditions and review the most current research into how or whether the use of herbs and supplements has been proven to prevent, affect or remove these health conditions or at least some of their symptoms. Can the Chinese herb Salvia curb cravings in alcoholics? Can niacin help treat anxiety? Other herbs, nutrients and conditions addressed include the use of zinc to reduce symptoms of anorexia and bulimia, ginkgo biloba for Alzheimer's and 5-HTP for depression. One appendix to this volume lists the top 20 brain-enhancing herbs and supplements. Another lists nutrient deficiencies and their links to health and brain function. It is not the intent of this book to advocate for the replacement of standard drug therapy but for the integration of these natural medicines with traditional medical treatments. Consumers are urged to discuss these herbs and nutrients with their physician before beginning use as some allergic reactions or interactions with traditional medicines can occur. The central argument of this book is that when properly nourished, people can operate at maximum physical and mental capacity with maximum ability to fend off or recover from disease and disorder.
