Good Science Non Fiction S:

Fictions in Science Mauricio Suárez, 2008-10-26 Science is popularly understood as being an ideal of impartial algorithmic objectivity that provides us with a realistic description of the world down to the last detail The essays collected in this book written by some of the leading experts in the field challenge this popular image right at its heart taking as their starting point that science trades not only in truth but in fiction too With case studies that range from physics to economics and to biology Fictions in Science reveals that fictions are as ubiquitous in scientific narratives and practice as they are in any other human endeavor including literature and art Of course scientific activity most prominently in the formal sciences employs logically precise algorithmic thinking However the key to the predictive and technological success of the empirical sciences might well lie elsewhere perhaps even in scientists extraordinary creative imagination instead As these essays demonstrate within the bounds of what is empirically possible a scientist s capacity for invention and creative thinking matches that of any writer or artist

Does Nonfiction Equate Truth? Vivian Yenika-Agbaw, Laura Anne Hudock, Ruth McKoy Lowery, 2018-03-15 Educators who teach children's literature at the college level as part of the pre-service experience seldom allocate enough space in the curriculum for nonfiction literature. This book recognizes the viability of nonfiction as a literary genre that demands critical analysis, celebrates storytelling in its varied forms, and invites teacher educators and pre-service teachers, our primary audience, to nurture a spirit of inquiry and skepticism in the classroom. It is an excellent resource for teacher educators looking for a variety of nonfiction texts to include in their literacy curriculum at both the undergraduate and graduate levels. It also offers critical approaches through which students are encouraged to read these texts and ideas for critical inquiry with young learners.
