Wisdom, Intelligence, and Creativity Synthesized Robert J. Sternberg, 2003-10-06 In Wisdom Intelligence and Creativity Synthesized Sternberg reviews and

summarizes the best research available on human intelligence. He argues that any serious understanding of intelligence must go beyond the standard paper and pencil tests currently in use. In addition to analytical and quantitative abilities, a theory of intelligence must take account of people's creative abilities, their ability to go beyond given information and imagine new and exciting ways of reformulating old problems. It must also take into account people's ability to weigh options carefully and act prudently. Understanding one's own intellectual shortcomings and learning how to overcome them is as important as developing one's strengths. Sternberg develops a vision of human intelligence that is far more nuanced and accurate than anything previously offered. *Wisdom, Intelligence, and Creativity Synthesized* will be essential reading for psychologists, cognitive scientists, educators, and organizational researchers. *The Oxford Handbook of School Psychology* Melissa A. Bray, Thomas J. Kehle, 2011-02-18. Kevin Nugent, Kathleen Thies, John F. Travers, 2013-11-25. The Development of Children and Adolescents by Penny Hauser-Cram, J. Kevin Nugent, Kathleen Thies, and John F. Travers provides an integrated view of child development. Presenting the most pertinent research for each developmental stage and linking this to practical applications in the areas of Parenting Policy and Practice, this balanced approach emphasizes the relationship between research and theory and applications. The rich media program, including WileyPLUS with Real Development, promotes active learning and allows for increased understanding and comprehension of the course content. Real Development, authored by Nicole Barnes, Ph.D., Montclair State University, and Christine Hatchard, Psy.D., Monmouth University, uses authentic video showcasing real families along with activities and assessments that put students in the place of a professional to gain an understanding of key concepts.
