## **Hurricane Manuel Weather Channel:**

Tempest Liz Skilton, 2019-06-01 Liz Skilton's innovative study tracks the naming of hurricanes over six decades exploring the interplay between naming practice and wider American culture. In 1953 the U.S. Weather Bureau adopted female names to identify hurricanes and other tropical storms. Within two years that convention came into question and by 1978 a new system was introduced including alternating male and female names in a pattern that continues today. In *Tempest: Hurricane Naming and American Culture* Skilton blends gender studies with environmental history to analyze this often controversial tradition. Focusing on the Gulf South, the nation's hurricane coast, Skilton closely examines select storms including Betsy, Camille, Andrew, Katrina, and Harvey while referencing dozens of others. Through print and online media sources, government reports, scientific data, and ephemera, she reveals how language and images portray hurricanes as gendered objects: masculine named storms are generally characterized as stronger and more serious, while feminine named storms are described as unladylike and in need of taming. Further, Skilton shows how the hypersexualized rhetoric surrounding Katrina and Sandy and the effeminate depictions of Georges represent evolving methods to define and explain extreme weather events. As she chronicles the evolution of gendered storm naming in the United States, Skilton delves into many other aspects of hurricane history. She describes attempts at scientific control of storms through hurricane seeding during the Cold War arms race of the 1950s and relates how Roxcy Bolton, a member of the National Organization for Women, led the crusade against feminizing hurricanes from her home in Miami near the National Hurricane Center in the 1970s. Skilton also discusses the skyrocketing interest in extreme weather events that accompanied the introduction of 24-hour news coverage of storms, as well as the impact of social media networks on Americans' tracking and understanding of hurricanes and other disasters. The debate over hurricane naming continues as Skilton demonstrates, and many Americans question the merit and purpose of the gendered naming system. What is clear is that hurricane names matter and that they fundamentally shape our impressions of storms for good and bad.

*Crash Course in Disaster Preparedness* Carmen Cowick, 2018-10-04 Every library needs to have a disaster management plan in place before disaster strikes. This short but thorough manual makes preparing for disaster less intimidating. All library staff, from library volunteers to library directors and branch managers, have a role to play in preparing for and recovering from disaster. Written by an expert in preservation services, *Crash Course in Disaster Preparedness* contains all of the information library professionals need to prepare for an emergency should one arise. Carmen Cowick identifies common terminology, teaches readers how to conduct risk assessment, how to write a disaster plan, and how to design emergency procedures, and introduces readers to the basic principles of salvaging. Throughout, Cowick shows readers how to prioritize library collections during a fire, flood, power outage, and other natural and human-caused disasters so as to maximize preservation of library materials.

**of Business Law** Edward Whiton Spencer, 1925 **Interrogating the Anthropocene** Jan Jagodzinski, 2018-05-09 This volume weaves together a variety of perspectives aimed at confronting a spectrum of ethico-political global challenges arising in the Anthropocene which affect the future of life on planet earth In this book the authors offer a multi-faceted approach to address the consequences of its imaginary and projective directions The chapters span the disciplines of political economy cybernetics environmentalism bio-science psychoanalysis bioacoustics documentary film installation art geoperformativity and glitch aesthetics The first section attempts to flesh out new aspects of current debates Questions over the Capitalocene are explored via confluences of class and climate revisiting the eco-Marxist analysis of capitalism and the financial system that thrives on debt The second section explores the imaginary narratives that raise questions regarding non-human involvement The third section addresses geoartistry the counter-artistic responses to the specularization of climate disasters questioning eco-documentaries and what a post-anthropocentric art might look like The last section addresses the pedagogical response to the Anthropocene Category 5 Thomas Neil Knowles, 2009-06-01 In the midst of the Great

Depression a furious storm struck the Florida Keys with devastating force With winds estimated at over 225 miles per hour it was the first recorded Category 5 hurricane to make landfall in the United States Striking at a time before storms were named the catastrophic tropical cyclone became known as the 1935 Labor Day Hurricane and its aftermath was felt all the way to Washington D C In the hardest hit area of the Florida Keys three out of every five residents were killed while hundreds of World War I veterans sent there by the federal government perished By sifting through overlooked official records and interviewing survivors and the relatives of victims Thomas Knowles pieces together this dramatic story moment

by horrifying moment He explains what daily life was like on the Keys why the veteran work force was there and relatively unprotected the state of weather forecasting at the time the activities of the media covering the disaster and the actions of government agencies in the face of severe criticism over their response to the disaster The Labor Day Hurricane of 1935 remains one of the most intense to strike America s shores Category 5 is a sobering reminder that even with modern meteorological tools and emergency management systems a similar storm could cause even more death and destruction today

**Disasters and Neoliberalism** Gabriela Vera-Cortés, Jesús Manuel Macías-Medrano, 2020-09-24 This book shows how the adoption of the neoliberal development model has increased the social vulnerability to disasters with a special focus on Mexico a country which once was the role model of the neoliberal turn in Latin America It brings together 12 case studies of disasters such as floods earthquakes and

volcanic emergencies in both urban and rural areas to show how neoliberal development projects and changes in legislation affected disaster prevention and management in different parts of the country. The case studies from Mexico are complemented by two comparative studies which analyze the impacts of neoliberalism in disaster prevention and management in Mexico, Brazil, United States and Italy. *Disasters and Neoliberalism: Different Expressions of Social Vulnerability* presents a unique contribution to the interdisciplinary field of disaster research by presenting qualitative studies of disaster vulnerability from the perspective of scholars from the Global South, bringing a fresh and critical approach to English speaking social sciences. Qualitative researchers working on disaster risks in a number of fields such as geography, anthropology, sociology, political science and environmental studies.
