Though your thermostat may vary somewhat from the description below, its operation will be similar.

**TEMPERATURE LEVELS**

Set the indicator (lever or dial) to the desired temperature response for both heating and cooling.

**FAN SWITCH**

In AUTO or ON mode, the blower operates only when the thermostat calls for heating or cooling. This mode is generally preferred when humidity control is a priority. Set the system switch for heating, cooling or auto operation. The auto mode allows the system to automatically switch from heating mode to cooling mode to maintain predetermined comfort settings.

**TEMPERATURE INDICATOR**

The temperature indicator displays the actual room temperature.

**PROGRAMMABLE THERMOSTATS**

Your Lennox system may be controlled by a programmable thermostat. These thermostats provide the added feature of programmable response for both heating and cooling. Refer to the user's information manual provided with your particular thermostat for operation details.

**BEFORE YOU CALL**

If your system fails to operate, check the following before calling for service:
