Hydrocracy and the Mekong Delta Simon Benedikter, 2014 Subduing nature and harnessing water resources rose to become the key paradigm of modernization in the Vietnam's Mekong Delta. Over the past 40 years, waterscape engineering turned Vietnam's largest river estuary into one of the most agriculturally productive areas in the world. This book traces water resources development from the time of the socialist-oriented hydraulic mission and Green Revolution which began in the late 1970s under the economic rationale of central planning to more recent trends responding to renovation policy, global environmental change, and Vietnam's capitalist transformation. Analytically, the focus is with the nexus of water regulation, bureaucratic power, and socio-ecological change, as well as the vested interests and corresponding strategic actions that coalesce around the technocratic hydro management. Going beyond the scope of the Mekong Delta, the book offers new perspectives and critical reflections on water governance dynamics and institutional reforms in Vietnam from both historical and contemporary perspectives. Sly, B.T. Hart, 2012-12-06 Introduction The Fourth Symposium on Sediment Water Interactions was held in Melbourne Australia February 16-20th 1987. The previous three symposia were held in Amsterdam Kingston Ontario and Geneva. In keeping with the approach established in Geneva, contributions addressed sediment-water interactions related to both fresh and salt water conditions. More than 160 papers were given in Melbourne, including more than 20 poster presentations, and collected Abstracts are available from Dr B.T. Hart. A total of 51 papers subsequently have been published as proceedings of the Melbourne Symposium. 45 of these appear in this issue of *Hydrobiologia*. A further six appeared earlier as a selection of papers in *J. Environ. Geol. and Water Science* 1988 issue 1. These six papers appear in abstract form only in the present publication. Although concerned with the global environment, the

International Association for Sediment Water Science attempts to ensure that there is a genuine opportunity for participants to focus on regional issues throughout the world and in particular to provide a local forum for their presentation The Melbourne meeting was particularly successful in achieving this objective and Australasia was well represented by about 36 percent of the contributors About 27 percent were from Europe 17 percent from North America 7 percent from China and Japan 7 percent from Southeast Asia and India and about 6 percent came from other areas In all 25 countries were represented **Bulletin** United States.
