Understanding Main Ideas

Interactions of waves is a broad subject. In this assignment, we focus on how the superposition principle is manifest in different situations.

1. **Interference** occurs through different configurations of waves.
2. **Constructive interference** occurs when the crests of two waves are in phase, resulting in a wave with double the amplitude.
3. **Destructive interference** occurs when the crests of one wave are in phase with the troughs of another wave, resulting in a wave with zero amplitude.

Reading "Introduction"

Read the first two paragraphs of the introduction to the article. The article discusses the superposition principle and its applications in different contexts.
