**Global Environment Outlook - GEO-6: Healthy Planet, Healthy People** UN Environment, 2019-06-06. Published to coincide with the Fourth United Nations Environmental Assembly, UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health. By bringing together hundreds of scientists, peer reviewers, and collaborating institutions and partners, the GEO reports build on sound scientific knowledge to provide governments, local authorities, businesses, and individual citizens with the information needed to guide societies to a truly sustainable world by 2050. GEO 6 outlines the current state of the environment, illustrates possible future environmental trends, and analyses the effectiveness of policies. This flagship report shows how governments can put us on the path to a truly sustainable future, emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people. This title is also available as Open Access on Cambridge Core.

**International technical guidance on sexuality education** UNESCO, UNAIDS, UNFPA, UNICEF, UN Women, WHO, 2018-01-15. **The Quest for the Sustainable Development Goals** Thiago Gehre Galvao, Henrique Zeferino de Menezes, 2024-08-22. The book presents the experiences, complexities, and contradictions of the implementation of the Sustainable Development Goals in Brazil so far. Through chapters from a variety of stakeholders, the book examines national, regional, and local aspects of development in Brazil. The chapters here draw from scientific knowledge and practical experience to take a critical look at what the SDGs mean in a Global South country and what the implications of this are for global development. The book is divided into three sections. The first section addresses the critical political and institutional aspects related to the implementation of the Sustainable Development Goals in Brazil, highlighting advances as well as pitfalls and setbacks. The chapters look at broad questions related to the role of civil society in defining political priorities and strategies to move forward with the SDGs, as well as issues involved in incorporating the SDGs at different levels of government and other institutions. The chapters in this section critically address the political and institutional advances as well as barriers to the progress of the SDGs in Brazil. The second section directly addresses progress made toward the SDGs in the context of the political, economic, and social variables specific to Brazil. The chapters address critical shortcomings and demands for Brazilian society: the need for improvements in education and employment policies to reduce poverty; the urgent need to increase gender equality and reduce violence; as well as the imperative to strengthen institutions and policies to mitigate climate change and protect the environment. The final section focuses on critically assessing the 2030 Agenda itself and drawing from a Global South IR perspective. The chapters here dialog with decolonial and post-developmental perspectives to highlight problems with the agenda and lift up sidelined priorities, presenting yet-unexamined policy solutions.

and innovations that are currently absent from the global institutional agenda The Brazilian case is a perfect illustration of how underdevelopment and political instability can constrain the paths to sustainable development while at the same time social innovations leverages based on regional dynamics and strength from social and cultural diversity can drive sustained progress **Routledge Handbook of National and Regional Ocean Policies** Biliانا Cicin-Sain,David

Vanderzwaag,Miriam C. Balgos,2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world **Beyond**

**Colonialism, Development and Globalization** Dominique Caouette,Dip Kapoor,2015-12-15 Development studies is in a state of flux A new generation of scholars has come to reject what was once regarded as accepted wisdom and increasingly regard development and globalization as part of a continuum with colonialism premised on the same reductionist assumption that progress and growth are objective facts that can be fostered measured assessed and controlled Drawing on a variety of theoretical perspectives and approaches this book explores the ways in which social movements in the Global South are rejecting Western centric notions of development and modernization as well as creating their own alternatives By assessing development theories from the perspective of subaltern groups and movements the contributors posit a new notion of development from below one in which these movements provide new ways of imagining social transformation and a way out of the developmental dead end that has so far characterized post development approaches Beyond Colonialism Development and Globalization therefore represents a radical break with the prevailing narrative of modernization and points to a bold new direction for development studies **Gender Visibility and Erasure** Vasilikie (Vicky) Demos,Marcia Texler

Segal,2022-08-15 Gender Visibility and Erasure offers a unique way of focusing on gender by identifying the multiple

contexts in which issues of visibility invisibility and erasure manifest considering who is seen and who is ignored who has voice and who is silenced who has agency and who is controlled

including areas occupied by peoples living in voluntary isolation Among these forces are legal and extracurricular payments made to individuals within indigenous communities and in state entities and the use of tax havens to deposit unofficial payments made to secure public contracts Solutions to loss of biodiversity and climate change may be found as much in the transformation of global financial and tax systems in terms of transparency and accountability as in efforts by states intergovernmental institutions and private foundations to protect wild areas through the designation of national parks through climate finance and other sustainable investment strategies *Encyclopedia of Environmental Health* ,2019-08-22 Encyclopedia of Environmental Health Second Edition Six Volume Set presents the newest release in this fundamental reference that updates and broadens the umbrella of environmental health especially social and environmental health for its readers There is ongoing revolution in governance policies and intervention strategies aimed at evolving changes in health disparities disease burden trans boundary transport and health hazards This new edition reflects these realities mapping new directions in the field that include how to minimize threats and develop new scientific paradigms that address emerging local national and global environmental concerns Represents a one stop resource for scientifically reliable information on environmental health Fills a critical gap with information on one of the most rapidly growing scientific fields of our time Provides comparative approaches to environmental health practice and research in different countries and regions of the world Covers issues behind specific questions and describes the best available scientific methods for environmental risk assessment **The Shifting Landscape of Global Trade Governance** Manfred Elsig,Michael Hahn,Gabriele Spilker,2019-08-08 Takes stock of current challenges to the world trading system and develops scenarios for the future
