How to Use Advanced Sewing Automations Dr. Prabir Jana, 2020-06-18 Both quality and productivity improvement are the driving forces for accelerating the growth of factories. Factories specialise in manufacturing of specialised products such as polo shirts, bottoms and shirts require specialised machineries with maximum level of mechanisation/automation. Whereas companies involved in manufacturing of multi-product categories which include fashion apparels have to deal with small order quantities with frequent style changeover. Hence flexibility and set up time minimisation are important criteria for equipment selection. In this series Dr Prabir Jana with the help of StitchWorld technical team identifies seven critical operations for analysis. **Juki**, **Threads Magazine**, 1991. *American Perspectives on Learning Communities and Opportunities in the Maker Movement* Barker, Bradley S., 2019-01-11 The maker movement culture emphasizes informal peer led and shared learning while driving innovation. Even though some experts view the maker movement as a move backward to pre-industrial revolution manufacturing, the purpose of making is not to have an abundance of tools in one space; rather it is about helping participants create personally meaningful projects with the help of mentors, experts and peers in ad hoc learning communities. *American Perspectives on Learning Communities and Opportunities in the Maker Movement* is an essential reference source that discusses the maker movement in the United States, artisanal perspectives and the learning through doing perspective. Featuring research on topics such as educational spaces, management, creativity labs, makerspaces and operating procedures, this book is ideally designed for entrepreneurs, artisans, academicians, researchers, manufacturing professionals and students. **JTN**, 1991. **Textile Asia**, 1991. *Knitting Times*, 1987-07. *Juki Model 6100 User's Manual*, 1983.
