Let's Review Regents: Living Environment Revised Edition Barron's Educational Series, Gregory Scott Hunter, 2021-01-05 Barron's Let's Review Regents Living Environment gives students the step by step review and practice they need to prepare for the Regents exam This updated edition is an ideal companion to high school textbooks and covers all Biology topics prescribed by the New York State Board of Regents This edition includes One recent Regents exam and question set with explanations of answers and wrong choices Teachers guidelines for developing New York State standards based learning units Two comprehensive study units that cover the following material Unit One explains the process of scientific inquiry including the understanding of natural phenomena and laboratory testing in biology Unit Two focuses on specific biological concepts including cell function and structure the chemistry of living organisms genetic continuity the interdependence of living things the human impact on ecosystems and several other pertinent topics **Slow Burn** R. Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In Slow Burn R Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny

conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally
