Skeletal Muscle Structure and Function

LEARNING OBJECTIVES

Structure

- Describe the structure of skeletal muscle tissue, including the sarcomere, myofibrils, and the overall muscle fiber.
- Explain the relationship between the structure and function of skeletal muscle tissue.
- Describe the structure of the sarcomere, including the Z-disc, actin, myosin, and the thick and thin filaments.
- Describe the structure of the myofibril, including the sarcomere, myosin, and the thick and thin filaments.
- Describe the structure of the muscle fiber, including the sarcomere, myofibril, and the overall muscle fiber.

Function

- Explain the relationship between the structure and function of skeletal muscle tissue.
- Explain the relationship between the structure and function of the sarcomere.
- Explain the relationship between the structure and function of the myofibril.
- Explain the relationship between the structure and function of the muscle fiber.

PURPOSE OF THE COURSE

Describe the structure and function of skeletal muscle tissue.

LEARNING OUTCOMES

- Explain the relationship between the structure and function of skeletal muscle tissue, including the sarcomere, myofibril, and the overall muscle fiber.
- Explain the relationship between the structure and function of the sarcomere, including the Z-disc, actin, myosin, and the thick and thin filaments.
- Explain the relationship between the structure and function of the myofibril, including the sarcomere, myosin, and the thick and thin filaments.
- Explain the relationship between the structure and function of the muscle fiber, including the sarcomere, myofibril, and the overall muscle fiber.

A skeletal muscle is composed of many individual muscle fibers. These fibers are arranged in parallel and are surrounded by a layer of connective tissue called the sarcolemma. The sarcolemma is the outer boundary of the muscle fiber. Inside the sarcolemma, the muscle fiber is filled with a fluid called the sarcoplasm. The sarcoplasm contains various organelles, including mitochondria, which are responsible for producing energy for the muscle fiber.

The sarcolemma is a thin layer of cell membrane that surrounds the muscle fiber. It is composed of phospholipids and proteins. The sarcolemma is responsible for maintaining the internal environment of the muscle fiber and for regulating the entry and exit of ions and molecules. The sarcolemma is also responsible for transmitting electrical signals from one muscle fiber to another. These signals are called action potentials and are responsible for the contraction of the muscle fiber.

Inside the muscle fiber, the sarcolemma is continuous with the sarcolemma of the surrounding muscle fibers. This allows for the transmission of electrical signals from one muscle fiber to another. The sarcolemma is also responsible for maintaining the internal environment of the muscle fiber and for regulating the entry and exit of ions and molecules.

Skeletal Muscle Henning Schmalbruch, 2012-12-06 This volume is intended to cover research in the field of muscle morphology since publication of the previous edition by Haggquist in 1956 The development of new techniques coupled with an intensified interest in muscle has resulted in a vast literature which no single person could review especially within the limitations of one volume When I accepted the flattering offer to write a new edition I quickly abandoned any hope of a comprehensive review Instead I tried to consider within my limits those lines of research which I believe to be important for the understanding of mammalian and ultimately human muscles under normal experimental and pathological conditions It would be naive to suggest that muscle can be adequately described in purely morphological aspects I would characterize the results of my effort as muscle as seen with the eyes of a morphologist It gives me pleasure to acknowledge the help of several colleagues who read and commented on drafts of individual chapters Dr Brenda Eisenberg Chicago Dr Else Nygaard Copenhagen Dr Stefano Schiaffino Padova Dr Michael Sjostrom Umea Dr Lars Erik Thornell Umea None of these individuals can be held responsible for any error or obscurity that persists Indeed without their assistance there would have been more I also thank those colleagues who allowed me to include their published and unpublished material their names and also those of the publishers who kindly granted copyright permission are given in the individual figure captions
