

LAVA LAMP

You'll need

A clear plastic or glass bottle or jar

Vegetable oil

Water

Effervescent tablet (a vitamin tablet or alka seltzer work well)

Instructions

Fill the bottle about a quarter full with water. Top up to near the top with vegetable oil.

The oil and water will separate into two layers.

Once the oil and water have separated, add a few drops of food colouring. The colour will mix with the water.

Drop half an effervescent tablet into the container and watch the bubbles.

Add more effervescent tablet little by little to keep the bubbles rising and falling.

Why does it work?

Alka seltzer is made of citric acid and sodium bicarbonate. As the tablet dissolves the citric acid and sodium bicarbonate mix to form carbon dioxide gas and sodium citrate. It is the bubbles of carbon dioxide that carry the coloured water into the oil giving a lava lamp effect.

Windows Vista: The Missing Manual David Pogue, 2006-12-27 Windows Vista is Microsoft's most important software release in more than a decade. It offers users an abundance of new and upgraded features that were more than five years in the making: a gorgeous glass-like visual overhaul, superior searching and organization tools, a multimedia and collaboration suite, and above all, a massive top-to-bottom security shield overhaul. There's scarcely a single feature of the older versions of Windows that hasn't been tweaked, overhauled, or replaced entirely. But when users first encounter this beautiful new operating system, there's gonna be a whole lotta head scratchin' starting with trying to figure out which of the five versions of Vista is installed on the PC: Home, Premium, Business, Enterprise, Ultimate. Thankfully, *Windows Vista: The Missing Manual* offers coverage of all five versions. Like its predecessors, this book from New York Times columnist, bestselling author, and Missing Manuals creator David Pogue illuminates its subject with technical insight, plenty of wit, and hard-nosed objectivity for beginners, veteran standalone PC users, and those who know their way around a network. Readers will learn how to navigate Vista's elegant new desktop, locate anything on your hard drive quickly with the fast, powerful, and fully integrated search function, use the Media Center to record TV and radio, present photos, play music, and record any of the above to DVD, chat, videoconference, and surf the Web with the vastly improved Internet Explorer 7 tabbed browser, build a network for file sharing, set up workgroups, and connect from the road. Protect your PC and network with Vista's beefed-up security. And much more. This jargon-free guide explains Vista's features clearly and thoroughly, revealing which work well and which don't. It's the book that should have been in the box.
