Bandia,James Hadley,Siobhán McElduff,2024-07-31 *Translation Classics in Context* carefully considers the relationship between translation and the classics It presents readers with revelatory and insightful case studies that investigate translations produced as part of nexuses of colonial resistance and liberation across Africa and in Ireland translations of novels and folklore collections that influence not just other fictions but stage productions and entire historical disciplines struggles over Ukrainian and Russian literature and how it is shaped and transferred and the role of the academy and the curriculum in creating notions of classic translations Along the way it covers oral poetry saints scholars Walter Scott and Jules Verne not to mention Leo Tolstoy and the Corpse Bride making her way from folklore to Frankenstein and into the world of Disney animation Contributors are all leading scholars and the book is accessible and engaging assuming no specialist knowledge Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *Spectral Analysis of Differential Operators* Fedor S. Rofe-Beketov,Aleksandr M. Khol'kin,Ognjen Milatovic,2005 This is the first monograph devoted to the Sturm oscillatory theory for infinite systems of differential equations and its relations with the spectral theory It aims to study a theory of self adjoint problems for such systems based on an elegant method of binary relations Another topic investigated in the book is the behavior of discrete eigenvalues which appear in spectral gaps of the Hill operator and almost periodic Schrödinger operators due to local perturbations of the potential e.g modeling impurities in crystals The book is based on results that have not been presented in other monographs The only prerequisites needed to read it are basics of ordinary differential equations and operator theory It should be accessible to graduate students though its main topics are of interest to research mathematicians working in functional analysis differential equations and mathematical physics as well as to physicists interested in spectral theory of differential operators *Scientific and Technical Aerospace Reports* ,1985 *Transnational Film Remakes* Iain Robert Smith,2017-03-08 What happens when a film is remade in another national context How do notions of translation adaptation and localisation help us understand the cultural dynamics of these shifts and in what ways does a transnational perspective offer us a deeper understanding of film remaking Bringing together a range of international scholars *Transnational Film Remakes* is the first edited collection to specifically focus on the phenomenon of cross cultural remakes Using a variety of case studies from Hong Kong remakes of Japanese cinema to Bollywood remakes of Australian television this book provides an analysis of cinematic remaking that moves beyond Hollywood to address the truly global nature of this phenomenon Looking at iconic contemporary titles such as *The Girl with the Dragon Tattoo* and *Oldboy* as well as classics like *La Bête Humaine* and *La Chienne* this book interrogates the fluid and dynamic ways in which texts are adapted and reworked across national borders to provide a distinctive new model for understanding these global cultural borrowings *The English Dialect Dictionary* Joseph Wright,1905
