Lipid Nutrition Randy L. Wysong,1990 Fats in foods and fat on the body have become national obsessions With due cause Research is showing the far reaching deleterious effects of obesity as well as relationships between lipid fat and oil consumption and a wide range of health

concerns In this seminal book Dr Wysong brings a surprise and reveals that fats are not the nutritional demons popularly assumed The key to health is not to avoid dietary fat and jump on the cholesterol checking and drug band wagon Lipids are a part of every cell and are essential components of hormones and body regulators Even cholesterol in its natural state is critical to health If it is not eaten the body produces it Dr Wysong provides the understanding necessary to avoid such popular and professional myths Natural fats are not something to avoid but rather to seek and cherish The real villain is food processing Heat light air hydrogenation and time are the enemies of healthful fats Not only does processing destroy important fats and oils but it can convert them to dangerous disease producing toxins Dr Wysong explains how to choose foods that are protected from these dangers Read carefully Lipid Nutrition can be one of those rare books which replaces the reading of dozens of others Whether you are a person just concerned with better health and nutrition or a professional seeking keys to prevention and treatment Lipid Nutrition will prove to be a wonderful aid to understanding and a valuable resource for making healthy decisions
