8) Describe the four types of fronts and the weather you would expect with each.

Type of Front	How It Forms	Weather It Brings
Cold front 	Forms when a cold air mass pushes under a warm air mass, forcing the warm air to rise.	Thunderheads can form as the moisture in the warm air mass rises, cools, and condenses. As the front moves through, cool, fair weather is likely to follow.
Warm front 	Forms when a moist, warm air mass slides up and over a cold air mass.	As the warm air mass rises, it condenses into a broad area of clouds. A warm front brings gentle rain or light snow, followed by warmer, milder weather.
Stationary front 	Forms when warm and cold air meet and neither air mass has the force to move the other. They remain stationary, or "standing still."	Where the warm and cold air meet, clouds and fog form, and it may rain or snow. Can bring many days of clouds and precipitation.
Occluded Front 	Forms when a warm air mass gets caught between two cold air masses. The warm air mass rises as the cool air masses push and meet in the middle.	The temperature drops as the warm air mass is occluded, or "cut off," from the ground and pushed upward. Can bring strong winds and heavy precipitation.
