

## Pump Up the Volume!

### Volume

**Volume** is how much space an object takes up. The beaker on the left measures the volume of water in milliliters (mL). The beaker on the right measures the volume of an object with an irregular shape plus the volume of the water. To find the volume of just the orange, you must use subtraction:

$$\left\{ \begin{array}{l} \text{volume of water and orange} \\ - \text{volume of water} \\ \hline \text{volume of orange} \end{array} \right\}$$
A diagram illustrating the subtraction process. It shows a beaker with water and an orange object, a beaker with water, and the orange object itself. The objects are arranged vertically, with the beaker containing both water and the orange object at the top, the beaker with water in the middle, and the orange object at the bottom. The entire diagram is enclosed in large curly braces on either side.
