QUESTION I have a 1994 Ford Taurus with 100,000 miles. The engine is running fine, but the car is making a noise that sounds like a rattling or clunking sound. It seems to be coming from the front end. What could be the cause of this noise?

ANSWER The noise you are describing could be caused by a number of factors. It could be a worn ball joint, a loose tie rod end, or a worn strut. It could also be a worn suspension bush or a loose brake pad. The best way to diagnose the problem is to have a mechanic inspect the car. They will be able to identify the source of the noise and recommend the appropriate repair.
