personal outcome This book introduces the reader to cutting edge theory and research in second language learner motivation and presents empirical research which investigates DMCs in the context of language learning The studies explore the wider relevance of DMC theory from participants recruited worldwide answering questions such as how many and which participants reported having experienced DMCs and what emerged as common triggers initiating such experiences The studies also discuss the pedagogical implications of DMC theory investigating whether it is possible to design and implement a project specifically a project with DMC potential in such a way that it may be able to purposefully facilitate a group DMC with learners in a second language classroom The book s accessible writing style makes it suitable for researchers and students who are interested in second language learning as well as for teachers and trainee teachers who are looking for classroom inspiration
