

research paper

Introduction

The purpose of this pack is to introduce the reader to the main features of the research process. The type of information which informs decisions about how to undertake a research project is described and supported by examples from primary care and other health services research. The pack is intended for health care professionals with little or no previous research knowledge.

If a project is worth doing then it is probably worth convincing an interested organisation to fund it. There are no guaranteed ways of securing funding but there are steps you can take to maximise your chances of success. Applying for research funding might sound like the starting point of the research process but applicants need to demonstrate a clear idea of the entire process of a research project, right up until what will happen at the end of the process (for example modes of dissemination and practical implementation of results), in order to convince a funding body that their money will be spent wisely.

The pack is split into two sections. The first section 'Getting Started', takes the reader through a whistle stop tour of the research process and provides advice on how to get beyond a vague research idea to something that (with expert help, hard work and lots of enthusiasm) has the potential to generate new insights into health care issues and concerns. The second section, 'Getting Funded', looks at the context of research funding in the UK and encourages the reader to put their own research ideas to the acid test of a funding application.

As many of the terms used may be either new or used in a context unfamiliar to readers, a glossary of terms is provided at the back of the pack. We have tried to make the exercises of practical use to the reader. Some of the exercises test the reader's understanding of the concepts contained within the pack, while others give the reader the opportunity to work with their research ideas about their own areas of interest.

The other resource packs in this series provide more detail on specific aspects of the research process. The reader is pointed to specific resource packs at various points within this pack. The full list of packs produced by The NIHR RDS EM / YH can be found at:

Introduction to Research Methodology for Specialists and Trainees P. M. Shaughn O'Brien, Fiona Broughton Pipkin, 2017-08-17 Health-centred research has changed hugely over the last ten years from the importance of computing software to the NHS becoming more involved in research. The expectations of grant-awarding bodies, ethics committees, and publishers have evolved and increased in many senses. This new edition is designed for trainee clinicians, not only those preparing for membership of the Royal College of Obstetricians and Gynaecologists (MRCOG) but also higher degree candidates and aspiring clinical academics. Chapter authors with extensive expertise make the path to embarking on research direct, straightforward, and most importantly, fun and interesting, particularly aiming to support those who trained clinically and are now undertaking a research project or beginning an academic career. There remains no single book with so much relevant information gathered in a single, succinct volume. This edition now covers the wide spectrum of modern research methods for all specialities, with five supplementary chapters on major obstetric and gynaecological subspecialties.

Writing and Publishing a Scientific Research Paper Subhash Chandra Parija, Vikram Kate, 2017-07-28 This book covers all essential aspects of writing scientific research articles, presenting eighteen carefully selected titles that offer essential, must-know content on how to write high-quality articles. The book also addresses other rarely discussed areas of scientific writing, including dealing with rejected manuscripts, the reviewer's perspective as to what they expect in a scientific article, plagiarism, copyright issues, and ethical standards in publishing scientific papers. Simplicity is the book's hallmark, and it aims to provide an accessible, comprehensive, and essential resource for those seeking guidance on how to publish their research work. The importance of publishing research work cannot be overemphasized. However, a major limitation in publishing work in a scientific journal is the lack of information on, or experience with, scientific writing and publishing. Young faculty and trainees who are starting their research career are in need of a comprehensive guide that provides all essential components of scientific writing and aids them in getting their research work published.

work depends upon it. However many manuscripts are rejected or sent back for major reworking not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented. It is one thing to write a good scientific paper however it is quite another thing to get it published. This requires some additional nous. In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor. By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't. The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error. The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers. The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful. All major points are illustrated with examples from his own published works. The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section. However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments. Each chapter concludes with a checklist to ensure all the key elements have been addressed.
