A Cross-Cultural Psychological Assessment Manual Alan Raphael, R. Lauren Miller, Theresa Jones, Charles

Golden, 2023-07-11 This user friendly manual provides a cross cultural psychological assessment battery including projective methods Authors outline a new empirically validated reliable system which seeks to update the scoreable and interpretable factors and entwine commonly respected tried and true graphomotor tests thereby maximizing their efficacy in the assessment of significant psychological traits in children and adults Because of its use as a gender fair culture free language free testing method it will be a valuable asset in all areas of current psychological assessment The CCPAB test takes approximately 20 to 40 minutes to administer and does not require any administration materials that most practitioners would not have readily available The CCPAB can be used by evaluators on its own or in conjunction with other psychological and neuropsychological test data as well as by mental health treatment providers seeking a quick and accurate way to assess the psychological functioning of individuals aged six years and older Multiple appendices contain information on scoring criteria scoring keys and a wealth of sample questions which will also be a useful resource for evaluators This manual is appropriate for users ranging from graduate level students in training and supervision to even the most skilled assessment psychologists for quick and valid assessment of a wide range of clients

The Projective Use Of Mother-And- Child

Drawings: A Manual Jacquelyn Gillespie, 2013-08-21 A unique and powerful new projective technique is now available to mental health professionals Based on the most primary of human relationships that between mother and child this technique is able to foster projections and identify perceptions of self and others that carry an unusually strong component of unconscious material Strikingly clear and accessible The Projective Use of Mother and Child Drawings is one of the few books on projective techniques to provide a consistent theoretical outlook and to address the very significant issues of transference and countertransference as they relate to this technique While firmly grounded in a psychodynamic view of personality development the volume also conveys a clinical outlook with applications suitable to a variety of theoretical

paradigms The author comprehensively considers the theoretical and practical aspects of mother and child drawings and how to both use and assess them to gain insight into the most fundamental reaches of the self She consistently cautions against overly simplified interpretations of the drawings and stresses the importance of using conclusions drawn from them only as indications for further assessment confirmation or rejection The book is replete with examples of mother and child drawings from all age groups in both average populations and those with both mental and physical pathologies The volume opens with a careful discussion of the theoretical considerations behind mother and child drawings as well as the development and validation of projective drawing techniques in general The next section on research issues discourages diagnostic labeling in favor of making optimum use of the highly personal and idiosyncratic nature of these drawings This chapter features an interesting attempt to classify mother and child drawings in relation to size of the figures A particularly fascinating chapter on the impact of art on the therapist focuses on artwork done by professional artists who have addressed the mother and child theme The author explores and analyzes several thematic works of art from varying time periods and cultures It is her intent to help mental health professionals to explore their responses to pictorial art as individuals and thereby gain new understandings of related transference and countertransference issues with clients Chapter four provides clear instructions for administering mother and child drawings as a projective technique and guidelines for their interpretation This section provides samples and analyses of age typical drawings from the general population They vary greatly in style and artistic proficiency and are included to provide an idea of the usual developmental sequence of drawing characteristics from early childhood through the adult years Drawings of groups with demonstrated psychological pathologies or physical and developmental abnormalities comprise the final chapter This section approaches the interpretation of drawings by asking questions about how they communicate basic self and object relations issues This commanding volume of interest to students and professionals alike will provide art therapists school psychologists and mental health practitioners of all stripes with a powerful new projective technique to add to their professional armamentarium

Handbook of Psychological and Educational Assessment of Children Cecil R. Reynolds, Randy W. Kamphaus, 2018-10-16 The two volumes of the Handbook of Psychological and Educational Assessment of Children Second Edition cover all aspects of child and adolescent assessment Leading clinical scientists summarize the state of the science of assessment paradigms instruments and methods With an emphasis on practical clinical considerations chapters also delve into issues related to test development psychometrics and bias Conveniently designed for reference or text use this vast knowledge base has been synthesized into two volumes which may be purchased separately or together INTELLIGENCE APTITUDE AND ACHIEVEMENT surveys assessment of intelligence learning styles and academic achievement covers historical issues and psychometric methods and addresses diversity issues ethical concerns and special topics in mental testing PERSONALITY BEHAVIOR AND CONTEXT reviews the use of projective methods interviewing and observation and objective methods of assessing personality and behavior
