Patterns of Heredity and Human Genetics

Patterns of Heredity and Human Genetics

Section 12.1 Mendelian Inheritance of Human Traits

In your notebook, read about modeling a pedigree.

Examine the pedigree on the right. Then answer the following questions.

1. Is the trait being studied in the pedigree recessive or dominant? Show the gene locus!

2. Are II-1 and II-2 carriers of the trait? Show the gene locus!

3. What is the probability that II-1 and II-2 will produce an individual with the trait being studied? Show a Punnett square in your work.

4. What is the likely genotype of II-4 for the trait being studied in the pedigree?

In your notebook, read about simple recessive heredity and simple dominant heredity.

Put each item in Column A, under the form of the matching item from Column B.

Column A

- _____ 1. Excessive alcohol use results from the presence of an autosomal recessive locus (single allele).

What's Left of Human Nature? Maria Kronfeldner,2018-10-16 A philosophical account of human nature that defends the concept against dehumanization Darwinian and developmentalist challenges Human nature has always been a foundational issue for philosophy What does it mean to have a human nature Is the concept the relic of a bygone age What is the use of such a concept What are the epistemic and ontological commitments people make when they use the concept In *What's Left of Human Nature* Maria Kronfeldner offers a philosophical account of human nature that defends the concept against contemporary criticism In particular she takes on challenges related to social misuse of the concept that dehumanizes those regarded as lacking human nature the dehumanization challenge the conflict between Darwinian thinking and essentialist concepts of human nature the Darwinian challenge and the consensus that evolution heredity and ontogenetic development result from nurture and nature After answering each of these challenges Kronfeldner presents a revisionist account of human nature that minimizes dehumanization and does not fall back on outdated biological ideas Her account is post essentialist because it eliminates the concept of an essence of being human pluralist in that it argues that there are different things in the world that correspond to three different post essentialist concepts of human nature and interactive because it understands nature and nurture as interacting at the developmental epigenetic and evolutionary levels On the basis of this she introduces a dialectical concept of an ever changing and looping human nature Finally noting the essentially contested character of the concept and the ambiguity and redundancy of the terminology she wonders if we should simply eliminate the term human nature altogether *British Social Attitudes* Alison Park,John Curtice,Katarina Thomson,Lindsey Jarvis,Catherine Bromley,Nina Stratford,2001-11-28 The indispensable annual British Social Attitudes

survey compiles describes and comments on a range of current social attitudes The series charts changes in British social values with annual surveys carried out from a nationwide sample of around 3 500 people by the National Centre for Social Research s team of interviewers The 18th Report summarizes and interprets data from the most recent survey and makes comparisons with findings from previous years The Rolls Royce of opinion surveys The Times

Contemporary Marriage Kingsley Davis,1986-08-20 This fascinating symposium is based on an assumption that no longer seems to need justification that the institution of marriage is today experiencing profound changes But the nature of those changes their causes and consequences is very much in need of explication The experts contributing to this volume bring a wide range of perspectives sociological anthropological economic historical psychological and legal to the problem of marriage in modern society Together these essays help illuminate a form of relationship that is both vulnerable and resilient

biological and social a reflection of and an influence on other social institutions Contemporary Marriage begins with an important assessment of the revolution in marital behavior since World War II tracing trends in marriage age cohabitation divorce and fertility The focus here is primarily on the United States and on industrial societies in general Later chapters provide intriguing case studies of particular countries There is a recurrent interest in the impact on marriage of modernization itself but a number of essays probe influences other than industrial development such as strong cultural and historical patterns or legislation and state control Beliefs and expectations about marriage are explored and human sexuality and gender roles are also considered as factors in the nature of marriage Contemporary Marriage offers a rich spectrum of approaches to a problem of central importance The volume will reward an equally broad spectrum of readers interested in the meaning and future of marriage in our society

The Dawn of Language Sverker Johansson, 2021-09-02 A model of popular science writing STEVEN POOLE Who was the first speaker and what was their first message An erudite tightly woven and beautifully written account of one of humanity's greatest mysteries the origins of language Drawing on evidence from many fields including archaeology anthropology neurology and linguistics Sverker Johansson weaves these disparate threads together to show how our human ancestors evolved into language users The Dawn of Language provides a fascinating survey of how grammar came into being and the differences or similarities between languages spoken around the world before exploring how language eventually emerged in the very remote human past Our intellectual and physiological changes through the process of evolution both have a bearing on our ability to acquire language But to what extent is the evolution of language dependent on genes or on environment How has language evolved further and how is it changing now in the process of globalisation And which aspects of language ensure that robots are not yet intelligent enough to reconstruct how language has evolved Johansson's far reaching authoritative and research based approach to language is brought to life through dozens of astonishing examples both human and animal in a fascinatingly erudite and entertaining volume for anyone who has ever contemplated not just why we speak the way we do but why we speak at all Translated from the Swedish by Frank Perry
