**Strategic Investments in Instrumentation and Facilities for Extraterrestrial Sample Curation and Analysis** National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Extraterrestrial Sample Analysis Facilities, 2019-03-29 The United States possesses a treasure trove of extraterrestrial samples that were returned to Earth via space missions over the past four decades Analyses of these previously returned samples have led to major breakthroughs in the understanding of the age composition and origin of the solar system Having the instrumentation facilities and qualified personnel to undertake analyses of returned samples especially from missions that take up to a decade or longer from launch to return is thus of paramount importance if the National Aeronautics and Space Administration NASA is to capitalize fully on the investment made in these missions and to achieve the full scientific impact afforded by these extraordinary samples Planetary science may be entering a new golden era of extraterrestrial sample return now is the time to assess how prepared the scientific community is to take advantage of these opportunities Strategic Investments in Instrumentation and Facilities for Extraterrestrial Sample Curation and Analysis assesses the current capabilities within the planetary science community for sample return analyses and curation and what capabilities are currently missing that will be needed for future sample return missions This report evaluates whether current laboratory support infrastructure and NASA s investment strategy is adequate to meet these analytical challenges and advises how the community can keep abreast of evolving and new techniques in order to stay at the forefront of extraterrestrial sample analysis

**Private International Law and Arbitral Jurisdiction** Faidon Varesis, 2022-12-23 International commercial arbitration and litigation are often seen as competing fora fields of law or markets This intersection is at its highest at the forefront of any proceedings at the jurisdictional stage The analysis of jurisdictional issues at the forefront of an arbitration has been confined in a descriptive analysis of the law and jurisprudence dealing with jurisdictional intersections almost in a mechanistic manner These are not however issues which can be treated as mere mechanical rules They are issues pertaining to core notions of authority sovereignty their origins and their allocation At the same time the pragmatic and practical domination of party autonomy is a fact which cannot be disregarded when one considers the normative and theoretical foundations of any model of dealing with these issues This book moves beyond an analysis of arbitration and jurisdiction clauses to reconcile theory and practice and provides an underlying theoretical model to explain and regulate jurisdictional intersections at the early stages of an arbitration from a private international law perspective It combines both an in depth engagement with the theoretical literature as well as a close examination and analysis of its practical consequences in the form of a restatement of the law of England and Wales From a methodological perspective it utilises contemporary theories in private international law to propose a coherent model of regulating arbitral jurisdictions which promotes autonomy and freedom of the parties at this stage Demonstrating first how the theoretical model can be applied in practice and second to provide a basis for a potential future top down or bottom up approach of adopting the proposed model it includes a succinct and practical codification of the current state of affairs in relation to the whole spectrum of jurisdictional issues in England and Wales to serve as a useful tool for practitioners considering jurisdictional issues both from the perspective of State courts and from the perspective of arbitral tribunals as well as academics researching in these areas

*Empire, Politics and the Creation of the 1935 India Act* Dr Andrew Muldoon, 2013-06-28 The 1935 Government of India Act was arguably the most significant turning point in the history of the British administration in India The intent of the Act a proposal for an Indian federation was the continuation of British control of India and the deflection of the challenge to the Raj posed by Gandhi Nehru and the nationalist movement This book seeks to understand why British administrators and politicians believed that such a strategy would work and what exactly underpinned their reasons It is argued that British efforts to defuse and disrupt the activities of Indian nationalists in the

interwar years were predicated on certain cultural beliefs about Indian political behaviour and capacity. However, this was not simply a case of Orientalist policy making. Faced with a complicated political situation, a staggering amount of information and a constant need to produce analysis, the officers of the Raj imposed their own cultural expectations upon events and evidence to render them comprehensible. Indians themselves played an often overlooked role in the formulation of this political intelligence, especially the relatively few Indians who maintained close ties to the colonial government, such as T B Sapru and M R Jayakar. These men were not just mediators as they have frequently been portrayed, but were in fact important tacticians whose activities further demonstrated the weaknesses of the colonial information economy. The author employs recently released archival material, including the Indian Political Intelligence records, to situate the 1935 Act in its multiple and overlapping contexts: internal British culture and politics, the imperial information order in India, and the politics of Indian nationalism. This rich and nuanced study is essential reading for scholars working on British Indian and imperial history.

**Commonwealth of Independent States Industry: Pulp and Paper Industry Directory - Strategic Information and Contacts** IBP, Inc, 2013-08 2011 Updated Reprint Updated Annually Commonwealth of Independent States CIS Industry Pulp and Paper Industry      **Intermediation and Beyond** Louise Gullifer, Jennifer Payne, 2019-01-24 The global shift from the direct holding of securities by investors to the current intermediated holding system raises many important legal issues. These include the impact of the intermediated holding system on the rights of investors and the enforcement of those rights against intermediaries and issuers. The cross border nature of many holding patterns adds another layer of complexity to these issues and reduces legal certainty. Against this, intermediation offers benefits for many investors, including the ability to hold a cross border portfolio with one intermediary, a reduction in costs, and the facilitation of the use of securities in the collateral repo and securities lending markets. This book covers a number of legal topics relating to intermediated securities, including the history of intermediation, the benefits and problems in the current intermediated holding system, and how future legal and technological developments could help to resolve these problems while retaining the benefits of intermediation. It also examines the possible impact of FinTech on this area, in particular the potential for Blockchain to be used in the issuing, holding, and settlement of securities, the extent to which this will solve some of the difficulties that currently exist, and whether the use of Blockchain will create new difficulties that will need to be overcome. This book, which originated in a series of workshops organised by the Commercial Law Centre at Harris Manchester College, Oxford, will appeal to those interested in financial and corporate law, including academics, practitioners, policy makers, and students.      **The Privileges and Immunities of International Organizations in Domestic Courts** August Reinisch, 2013-09-12 International organizations are increasingly operating across borders and engaging in legal transactions in virtually all jurisdictions. This makes familiarity with the applicable law and practice imperative for both international organizations and those who engage in legal relations with them. Furthermore, the issue of whether, how, and to what extent domestic courts take into account

decisions of foreign and international courts and tribunals in their own decision making has become increasingly important in recent years This book provides a comprehensive empirical study of this transnational judicial dialogue focusing on the law and practice of domestic jurisdictions concerning the legal personality privileges and immunities of international organizations It presents a selection of detailed country by country studies examining the manner of judicial dialogue across domestic jurisdictions and between national and international courts The approach taken in this book intersects with three highly topical areas of international legal scholarship the rapidly evolving law of international institutions the burgeoning research into the role of domestic courts in the international legal system and the recent rise of empirically oriented legal scholarship Utilizing OUP's International Law in Domestic Courts database the book presents analysis of little known cases which have real international significance illustrating the impact and extent of transnational judicial dialogue in the international legal system The book provides important perspectives on the evolution and status of the law of immunity of international organizations and contributes to the understanding of relationships between national courts and between national and international courts

*Building Big Business in Russia* Yuko Adachi, 2013-09-05 This book examines the development of big business in Russia since the onset of market oriented reform in the early 1990s It explains how privatized post Soviet enterprises many of which made little sense as business units were transformed into functional firms able to operate in the environment of a market economy It provides detailed case studies of three key companies Yukos Oil Company Siberian Russian Aluminium and Norilsk Nickel all of which played a key role in Russia's economic recovery after 1998 describing how these companies were created run and have developed It shows how Russian businesses during the 1990s routinely relied on practices not entirely compatible with formal rules in particular in the area of corporate governance The book fully explores the critical role played by informal corporate governance practices

such as share dilution transfer pricing asset stripping limiting shareholders access to votes and bankruptcy to order as Russian big business developed during the 1990s Unlike other studies on Russian corporate governance this book highlights the ambiguous impact of informal corporate governance practices on the companies involved as commercial entities and suggests that although their use proved costly to Russia's business reputation they helped core groups of owners managers at the time to establish coherent business firms Overall the book shows that we cannot understand the nature of current economic changes in Russia without recognising the crucial role played by informal corporate governance practices in the creation and development of big business in post Soviet Russia
