Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Education under Siege Mortimore, Peter, 2013-09-23 At a time when education is considered crucial to a country's economic success, recent UK governments have insisted their reforms are the only way to make England's system world class. Yet pupils are tested rather than educated, teachers bullied rather than trusted, and parents cast as winners or losers in a gamble for school places. *Education under siege* considers the English education system as it is and as it might be. In a highly accessible style, Peter Mortimore, an author with wide experience of the education sector both in the UK and abroad, identifies the current system's strengths and weaknesses. He concludes that England has some of the best teachers in the world but one of the most muddled systems. Challenging the government's view that there is no alternative, he proposes radical changes to help all schools become good schools. They include a system of schools receiving a fair balance of pupils who learn easily and those who do not, ensuring a more even spread of effective teachers, as well as banning league tables, outlawing selection, opening up faith schools, and integrating private schools into the state system. In the final chapter, he asks readers who share his concerns to demand that the politicians alter course. The book will appeal to parents, education students, and teachers, as well as everyone interested in the future education of our children.
