Sachs,Lise Johnson,Jesse Coleman (Researcher),2021 *The Taxation of Fees for Technical Services on the Basis of Article 12A UN Model Convention* David Orzechowski-Zölzer,2024-05-21 Although rules on the allocation of taxing rights for fees for technical services have been provided for in bilateral tax treaties by African Asian and South American countries for decades it was only in the 2017 update that the UN Model Tax Treaty included Article 12A on the matter thus

suggesting its inclusion in the tax treaty network of its Member States. Consequently from a cross border perspective the interpretation of Article 12A is of great importance for both taxpayers and tax authorities. This book presents the first comprehensive analysis of the scope of technical services in comparison to ordinary non technical services and the differentiation between Article 12A and other allocation rules of the UN Model. The book's analysis focuses on the interpretation of the concept of technical services by examining the historical evolution of Article 12 of the OECD and UN Models and the systematic context in which it is embedded. Aspects of this analysis examined include the following: the base erosion principle as justification for establishing source taxing rights without the physical presence of the service provider in the state in which fees for technical services arise; whether the term technical is sufficiently defined in the Commentaries to the UN Model or whether it shall be ascribed a different meaning to increase legal certainty for tax authorities and taxpayers; relevance of the OECD Model and its Commentaries as the basis for the UN Model and its Commentaries; rules of precedence concerning the application of Article 12A in relation to the other allocation rules of the UN Model; the connection between royalties and fees for technical services; application of Article 12A UN Model to challenges arising from the digitalized economy and the allocation of taxing rights for fees for technical services rendered in a third state. Tax treaties of selected African countries are examined as these countries were the earliest adopters of the concept of fees for technical services into their tax treaty network. The book also provides an overview of literature and jurisprudence on country practices in Brazil, India and other countries as well as relevant documents of international organizations. This book provides practitioners, government officials and academics with a deep understanding of the interpretation and application of Article 12A UN Model. It will prove of great value in preparing for tax treaty negotiations and also in informing and advising enterprises that intend to conduct business in developing countries through the provision of specialized services.

A Research Agenda for Tax Law Parada, Leopoldo, 2022-10-11. This Research Agenda considers the future direction of research in tax law, channeling creative thinking from leading tax scholars around the world who explore potential routes for further development in both traditional and more unconventional areas of tax law.

Tax Avoidance and European Law Mihaela Tofan, 2022-06-07. Tax law is one of the legal fields with the most subtle influence on European integration and EU law. The European economic cooperation project emerged with the customs union, essentially a tax law concept, and evolved alongside other topics of tax harmonization. Still, the existence of the EU tax law is disputed. The research on the topic is significant as the integration of national economies and markets has increased substantially both within the EU and globally. This has put a strain on domestic tax rules which are subject to the demands of the international taxation requirements. This book explores the relationship between tax avoidance, regulation and sovereignty within the European Union, analyzing the impact of the effective regulatory methods for limiting and eliminating aggressive tax planning by multinational companies. Focusing on analyzing good practice in fiscal regulation, efficiency and the results generated by the tax jurisprudence both at national and

European level its main objective is to present the argument for inter dependency between taxation and the current changes in the concept of sovereignty It highlights where fiscal regulation has led to uniform yet flexible solutions for the actual fight against companies abusive fiscal conduct when taking advantage of tax competition This text will be of value to academics researchers and advanced students in tax law and tax avoidance regulation and their intersection with sovereignty in the context of the European Union
