Suicide and the Law Elizabeth Wicks, 2023-02-23 This book investigates the law's approach to suicide in England and Wales. It explores the seismic shift in perceptions of the law's role in respect of suicide from imprisonment as a punishment for attempting suicide to courts hearing arguments about whether there is not only a right to suicide but also a right to assistance in suicide. This development stands alongside a global recognition of suicide prevention as a public health priority. In this book the dual priorities of respect for autonomy and the protection of human life are recognised as equally important and the legal issues surrounding suicide in a range of different contemporary contexts including suicide in prison and juvenile suicide are considered. The book also investigates what the relationship between mental health and suicide means for its legal regulation and evaluates the enduring legal offence of assisted suicide particularly in the context of the terminally ill. It is argued that a more refined approach to the topic of voluntary death should be recognised in the law one that distinguishes more clearly between autonomous decision making about the end of life and incapacitated self-caused risks to life that require effective preventative interventions.

A Liberal Theory of Practical Morality Earl Spurgin, 2021-05-25 Moral issues and questions abound in daily life. Media outlets frequently raise awareness of many such as those concerning individuals' right to privacy. The same venues seldom if ever raise awareness of others such as moral issues and questions concerning our fantasies. Regardless of the level of publicity various venues afford particular moral matters most people who become aware of those matters find many interesting and important. A problem most encounter however is determining the criteria through which they should approach the moral matters they wish to engage. Ethicists have long sought a moral theory that would provide the desired criteria but most will grant readily that those efforts have not produced a generally accepted theory. This book presents the author's case that a kind of moral liberalism is the theory we should use to engage daily life's moral matters. The author presents a conception of moral liberalism argues that it is the best approach to practical morality in a plural society and applies it to several of morality's practical matters.

Normativity and Agency Tamar Schapiro, Kyla Ebels-Duggan, Sharon Street, 2022 Christine M. Korsgaard has had a profound influence on moral philosophy over the past forty years. This volume is written in her honor engaging with seminal questions that recur in her writing and teaching and staking out provocative new positions on topics in ethics agency and the normative dimension of human life that are central to her work.

Intervention or Protest Gabriel Garmendia da Trindade, Andrew Woodhall, 2020-10-06 Within current political social and ethical debates both in academia and society activism and how individuals should approach issues facing nonhuman animals have become increasingly important hot issues. Individuals groups advocacy agencies and governments have all espoused competing ideas for how we should approach nonhuman use and exploitation. Ought we proceed through liberation Abolition Segregation Integration. As nonhuman liberation welfare and rights groups increasingly interconnect and identify with other social justice movements resolutions to these questions have become increasingly entangled with questions of what justice and our ethical commitments demand on this issue and the topic has become

increasingly significant and divisive The book considers how this question and contemporary issues facing nonhumans such as experimentation hunting and factory farming should be answered by drawing on both theory and practice in order to provide grounded yet actionable ways forward Indicatively the book covers topics such as The intersection between nonhuman ethics and the ethics of war and self defence Nonhuman animals as political subjects and acting agents Whether we should intervene for nonhuman animals in cases of natural disaster Various explorations of why the nonhuman movement may not be succeeding as well as it could be Comparisons between the nonhuman movement and other social movement Arguments for and against intervening to help or save nonhumans and how far we may go What intervention could ultimately mean for nonhumans The book is therefore intended not only to provide new and interesting insight into the area and important contemporary discussions but also to constructively aid the nonhuman movement and unite theory and practice on the crucial issues With the nonhuman movement and its past approaches currently being questioned as a success more nonhumans than ever being harmed and exploited and a growing gulf between activists and scholars this book will not only be a timely addition to the literature but an attempt to bridge these gaps and move both theory and practice and thus the movement and field forward
