Additionally, you can enable the Dynamic Grid which displays dotted lines on the drawing page to show the location for the center of the next shape you drop on the page in relationship to the placement of existing shapes. Now you can focus on enabling or disabling specific snapping options in the Snap to section. The Glue feature is useful in flow charts and organizational charts. In the Glue to category you can set options to glue shapes to the diagram guides or to connection points.

Guides are nonprinting lines that can assist you in working with shape placement and shape movement. For example, you can glue several shapes to a guide so that when the guide is moved, all the glued shapes move as well. To place a guide in the drawing, hover the mouse on the horizontal or vertical ruler. A ScreenTip appears as seen here. Now drag a guide from the Company of the Parties of the Partie

A red square indicates that you are about to glue the shape to the guide. Click and drag the remaining shapes to glue them to the guide.

- 7 Now you can move the guide by dragging it (it becomes a blue vertical line) and all the glued shapes will move with the guide.
- 8. Click the Dialog Box Launcher in the Show group to customize the appearance, subdivisions and measurements of the Rulers and

Gridlines on the diagram. For example, choosing a Coarse selection for the Rules and Grid results in a wider display.
