

03 Improved productivity

FANUC Digital Twin concept

A digital twin is the concept of creating a digital replica of your physical machines, production processes or shop floor layout in order to generate a number of competitive advantages.

- **Factor proof of concept:** you can test the system to confirm the theoretical logic
- **Design part programs faster:** programmers can test G-code without taking a machine out of production
- **Immersion and skills training:** no need to take the machine offline
- **Virtual commissioning:** your machine tool stays in operation, minimising downtime
- **Better customer support:** before a FANUC technician arrives, our remote customer support team can diagnose the problem
- **Digitalisation of the machine shop:** with FANUC Digital Twin you can provide end-to-end digitalisation from CAM to control, optimising process flow

Need to improve your daily or weekly output? Let FANUC CNC technology provide you with that much-needed boost.

FANUC CNC GUIDE, Surface Estimation and AI Servo Monitor

Part of the FANUC Digital Twin concept, you can use CNC Guide to reproduce CNC behaviour and leverage the surface estimation function to maximise part finish prior to cutting. You can also take advantage of AI Servo Monitoring to analyse and evaluate spindle data.

- Visualise the effect of CNC functions with CNC position command
- Get an exact cycle time estimate before actual cutting
- Measure servo position data during air cutting with Servo Wizard
- Estimate and visualise component surface finish prior to actual cutting
- Enjoy efficient service by remote maintenance

FANUC MT-LINK

This PC software platform is able to collect, manage and analyse data from FANUC and non-FANUC controlled equipment and devices. With MT-LINK you can access the production status of the entire factory floor at a glance, in real time.

- Feeds production data over a secure network into a single centralised point, meaning it can be analysed remotely from your production office
- Contributes to making the machine tool ready
- Easy to set-up, no special hardware required
- Accessible via any PC or internet-enabled device within your factory network
- A single system can monitor from 1 to 100 machines
- Allows you to monitor operational results on an individual machine basis
- Diagnostic capabilities help you to identify bottlenecks
