INSTRUMENTS AND CONTROLS

Figure 3
Instruments and controls of the Ford 800 Model Tractor.

BRAKE PEDALS

These pedals are used to stop the tractor, to hold the tractor in a stationary position, or to assist in making sharp turns as outlined below:

To stop the tractor, depress both pedals at the same time. Before driving the tractor in high gear, always lock the pedals together.

To hold the tractor in a stationary position, lock the pedals together, depress them, and lock them in their depressed position by using the brake pedal lock.

To assist in making a sharp turn, operate the pedals individually, depressing the pedal on the side toward which the turn is to be made.

The brake pedal lock (shown in Figure 3) is used to lock both brake pedals together, allowing the tractor to operate simultaneously.

Caution: Always lock the brake pedals together when driving the tractor in high gear (high speed). To lock the pedals

together, engage the lock (in back of the left pedal, shown 1-4 in the slot in back of the right pedal). When the brake pedals are not locked together, the lock should rest in the slot in back of the left brake pedal.

The brake pedal lock (shown in Figure 3) is used to lock the brake pedals in the depressed position, thus preventing the tractor from moving.

CLUTCH PEDAL

This pedal, when depressed all the way, disengages the engine from the transmission.

FUEL STOP CONTROL BUTTON

The fuel stop control button is used when starting or stopping the engine. Push the button in when starting the engine. Pull it out when stopping the engine.
