Steel Designers' Manual SCI (Steel Construction Institute), 2016-06-27 In 2010, the then current European national standards for building and construction were replaced by the EN Eurocodes, a set of pan-European model building codes developed by the European Committee for Standardization. The Eurocodes are a series of 10 European Standards, EN 1990, EN 1991, EN 1992, EN 1993, EN 1994, EN 1995, EN 1996, EN 1997, EN 1998, and EN 1999, that provide a common approach for the design of buildings, other civil engineering works, and construction products. The design standards embodied in these Eurocodes will be used for all European public works and are set to become the de facto standard for the private sector in Europe, with probable adoption in many other countries. This classic manual on structural steelwork design was first published in 1955, since when it has sold many tens of thousands of copies worldwide. For the seventh edition of the *Steel Designers Manual*, all chapters have been comprehensively reviewed, revised to ensure they reflect current approaches and best practice, and brought in to compliance with EN 1993 Design of Steel Structures, the so-called Eurocode 3. **A Practical Guide to Sustainable Fashion** Alison Gwilt, 2020-07-09 Packed with examples from groundbreaking designers such as Vivienne Westwood, Stella McCartney, Edun, and People Tree, *A Practical Guide to Sustainable Fashion* is a much-needed overview of current models of fashion design and production. Alison Gwilt introduces the key issues associated with the production, use, and disposal of fashion clothing and gives step-by-step guidance on how to identify and evaluate the potential impacts of a garment during the design process. With innovative examples of best practice from international designers and brands, the chapters follow each key stage in the life cycle of a fashion garment and explore approaches such as low-impact textiles, techniques for mono-materiality, zero-waste techniques, upcycling, repair and maintenance techniques, and closed-loop design systems. New to this edition: more in-depth coverage of design thinking, materials, and manufacture; practical techniques for creating faster, recyclable fashion; and new ways forward for fashion such as including the circular economy and the Sustainable Development Goals. Shaping Sustainable Fashion Alison Gwilt, Timo Rissanen, 2012-06-25 The production, use, and eventual disposal of most clothing is environmentally damaging, and many fashion and textile designers are becoming keen to employ more sustainable strategies in their work.
