The Egyptians used three types of writing: hieroglyphics, hieratic, and demotic. The hieratic and demotic writing systems were simplified forms of hieroglyphics that scribes used to write quickly. Egyptians created over 700 hieroglyphs. Each was like a little drawing. Some were pictures of the items for which they represented, while others were sounds or groups of letters. Most people did not read or write in ancient Egypt. Scribes learned hieroglyphics from a young age. They wrote information on papyrus, a type of paper made from reeds. It was then rolled up. The chart above shows the letters used by scribes.

Translation/re-Creation Duncan Poupard, 2021-11-29 This book is a study of European language translations of Naxi ritual manuscripts the ritual literature of a small ethnic group living in southwest China's Yunnan Province The author discusses the translations into European languages in English French and German from the late nineteenth century to the second half of the twentieth century revealing a history of fragmentary yet interconnected translation efforts in the West By exploring this network he shows how translation can be understood as a metonymic recreation of textual worlds As Naxi manuscripts are semi oral texts representing an oral formulaic tradition their translation involves a metonymic relay of partial incorporations from manuscript image to reading spoken language Therefore the book engages in a series of textual excavations to uncover the previously occluded contemporaneous readings that would have led to the translations we can

consult today particularly in an attempt to understand how the Nazi literature came to be part of Ezra Pound's Cantos. Scholars in the field of ethnic minority literature in China and translation studies will find this book beneficial and it will make new contributions to comparative literature between the East and West. *Before Photography* Kirsten Belgum, Vance Byrd, John D. The Money Changers Robert G. Williams, 2013-07-04 At almost 2 trillion per day in trades currency markets vitally link the world together. Yet few people understand how they work and why they are prone to instability and bouts of panic. This book takes the reader behind the scenes on a tour of the places the machines the circuitry and the people involved in moving world money. This journey begins as a traveler removes foreign currency from an ATM machine in Istanbul. The author guides us from the periphery of the market into its neural centers in financial hubs such as London and New York. Currency traders market analysts money managers and payments systems architects show their workplaces and reveal their day to day experiences in this unpredictable and rapidly evolving world. The experts interviewed may use unfamiliar terms but the logical progression of the chapters and participants' stories told in workplace settings bring abstract concepts down to earth. After completing the tour the reader will have a clear picture of the geographical and structural organization of global currency markets and the people who run them. This vision of a volatile evolving structure will provide a useful framework for deciphering the complex causes of yet unforeseen financial events.
