Roaring Twenties in New York was a time of exuberant ambition free flowing optimism an explosion of artistic expression in the age of Prohibition New York was the city that embodied the spirit and strength of a newly powerful America In 1924 in the vibrant heart of Manhattan a fierce rivalry was born Two architects William Van Alen and Craig Severance former friends and successful partners but now bitter adversaries set out to imprint their individual marks on the greatest canvas in the world the rapidly evolving skyline of New York City Each man desired to build the city s tallest building or skyscraper Each would stop at nothing to outdo his rival Van Alen was a creative genius who envisioned a bold contemporary building that would move beyond the tired architecture of the previous century By a stroke of good fortune he found a larger than life patron in automobile magnate Walter Chrysler and they set out to build the legendary Chrysler building Severance by comparison was a brilliant businessman and he tapped his circle of downtown old money investors to begin construction on the Manhattan Company Building at 40 Wall Street From ground breaking to bricklaying Van Alen and Severance fought a cunning duel of wills Each man was forced to revamp his architectural design in an attempt to push higher to overcome his rival in mid construction as the structures rose floor by floor in record time Yet just as the battle was underway a third party entered the arena and announced plans to build an even larger building This project would be overseen by one of Chrysler s principal rivals a representative of the General Motors group and the building ultimately became known as The Empire State Building Infused with narrative thrills and perfectly rendered historical and engineering detail Higher brings to life a sensational episode in American history Author Neal Bascomb interweaves characters such as Al Smith and Governor Franklin Delano Roosevelt leading up to an astonishing climax that illustrates one of the most ingenious and secret architectural achievements of all time Jewish Education and Society in the High Middle Ages Ephraim

Kanarfogel,2007-06-11 Paperback edition of a favorite text on the literary creativity and communal involvement in the production of the Tosafist corpus The Jews of northern France Germany and England known collectively as Ashkenazic Jewry have commanded the attention of scholars since the beginnings of modern Jewish historiography Over the past century historians have produced significant studies about Jewish society in medieval Ashkenaz that have revealed them as a well organized creative and steadfast community Indeed the Franco Russian Jewry withstood a variety of physical political and religious attacks in the twelfth and thirteenth centuries to produce an impressive corpus of Talmudic and halakhic compositions known collectively as Tosafot that revolutionized the study of rabbinic literature Although the literary creativity of the Tosafists has been documented and analyzed and the scope and policies of communal government in Ashkenaz have been fixed and compared no sustained attempt has been made to integrate these crucial dimensions Jewish Education and Society in the High Middle Ages considers these relationships by examining the degree of communal involvement in the educational process as well as the economic theories and communal structures that affected the process from the most elementary level to the production of the Tosafist corpus By drawing parallels and highlighting differences to pre Crusade

Ellis,2021-08-10 A series of near riots on campuses aimed at silencing guest speakers has exposed the fact that our universities are no longer devoted to the free exchange of ideas in pursuit of truth But this hostility to free speech is only a symptom of a deeper problem writes John Ellis Having watched the deterioration of academia up close for the past fifty years Ellis locates the core of the problem in a change in the composition of the faculty during this time from mildly left leaning to almost exclusively leftist He explains how astonishing historical luck led to the success of a plan first devised by a small group of activists to use college campuses to promote radical politics and why laws and regulations designed to prevent the politicizing of higher education proved

insufficient Ellis shows that political motivation is always destructive of higher learning Even science and technology departments are not immune The corruption of universities by radical politics also does wider damage to primary and secondary education to race relations to preparation for the workplace and to the political and social fabric of the nation Commonly suggested remedies new free speech rules or enforced right of center appointments will fail because they don't touch the core problem a controlling faculty majority of political activists with no real interest in scholarship This book proposes more drastic and effective reform measures The first step is for Americans to recognize that vast sums of public money intended for education are being diverted to a political agenda and to demand that this fraud be stopped

Take Back Higher Education Henry A. Giroux,Susan Searls Giroux,2004-06-24 Higher education is under siege No longer viewed as a public good it is attacked by businesses who want to refashion institutions in the image of the marketplace Higher education is the target of cultural conservatives who have undermined academic freedom and access by deriding the academy as a hotbed of left multicultural radicalism and anti Americanism The historic mission to educate students as citizens motivated by democratic values is overshadowed by profit margins Giroux and Giroux argue that the greatest danger faced by higher education comes from corporatization and educational apartheid If higher education is to meet the challenges of a democratic future it must encourage students to be critical thinkers and citizens as it vouchsafes conditions for educators to produce scholarship in the service of an inclusive democracy
