Pohjolainen, Tuomas Myllykoski, Christian Mercat, Sergey Sosnovsky, 2018-07-16 This open access book provides a
comprehensive overview of the core subjects comprising mathematical curricula for engineering studies in five European
countries and identifies differences between two strong traditions of teaching mathematics to engineers The collective work
of experts from a dozen universities critically examines various aspects of higher mathematical education The two EU
Tempus IV projects MetaMath and MathGeAr investigate the current methodologies of mathematics education for technical
and engineering disciplines The projects aim to improve the existing mathematics curricula in Russian Georgian and
Armenian universities by introducing modern technology enhanced learning TEL methods and tools as well as by shifting the
focus of engineering mathematics education from a purely theoretical tradition to a more applied paradigm MetaMath and
MathGeAr have brought together mathematics educators TEL specialists and experts in education quality assurance from 21
organizations across six countries The results of a comprehensive comparative analysis of the entire spectrum of
mathematics courses in the EU Russia Georgia and Armenia has been conducted have allowed the consortium to pinpoint and
introduce several modifications to their curricula while preserving the generally strong state of university mathematics
education in these countries The book presents the methodology procedure and results of this analysis This book is a valuable
resource for teachers especially those teaching mathematics and curriculum planners for engineers as well as for a general
