Citation Analysis and Dynamics of Citation Networks Michael Golosovsky,2019-09-26 This book deals with the science of science by applying network science methods to citation networks and uniquely presents a physics inspired model of citation dynamics This stochastic model of citation dynamics is based on a well known copying or recursive search mechanism The measurements covered in this text yield parameters of the model and reveal that citation dynamics of scientific papers is not linear as was previously assumed This nonlinearity has far reaching consequences including non stationary citation distributions diverging citation trajectories of similar papers and runaways or immortal papers with an infinite citation lifespan The author shows us that nonlinear stochastic models of citation dynamics can be the basis for a quantitative probabilistic prediction of citation dynamics of individual papers and of the overall journal impact factor This book appeals to students and researchers from differing subject areas working in network science and bibliometrics

How to Write Better Medical Papers Michael Hanna,2019-03-20 This book guides medical researchers through all stages of transforming their scientific data and ideas into a published paper Many researchers in medicine including the life sciences and health sciences struggle to get their research written and published Manuscripts are typically rejected and or sent back for revisions several times before ever being published One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers research methodology ethics statistics data visualization writing revising and the practicalities of publishing Instead of wasting the reader s time discussing trivialities of punctuation spelling etc this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals The section Preparing covers the range of methodological ethical and practical aspects that researchers need to address before starting to write their paper The section Analyzing reviews commonplace problems in the statistical analysis and presentation and how to resolve those problems The section Drafting describes what to write in all the various parts of a paper the Introduction Methods Results Discussion Abstract etc The section Revising explains and illustrates how to improve the writing style of any manuscript The section

Newark,2024-09-04 Within the broader study of decision making the Carnegie perspective occupies a unique place Initially developed by pioneering scholars such as Herbert Simon and James March it views organizational decisions as resulting from the combined influences of a psychological processes of attention allocation interpretation of experience and motivated search and b features of the organizational context that direct attention influence preferences contend with ambiguity contain conflict and divide labor Despite its unique strengths and a considerable body of work see below some foundational references research that adopts the Carnegie perspective is still relatively unknown outside the field of organization studies As James March noted Carnegie has been primarily an importer of ideas rather than an exporter The goal of this research topic is to facilitate dialogue and integration between this well established Carnegie perspective and other lines of inquiry into the study of decision making and problem solving We are interested in bringing to the fore what is distinctive in the accumulated body of evidence produced by the Carnegie perspective and highlighting similarities differences and potential

points of connection with other research done on similar topics To achieve this goal we hope that the front end of each submission will cover the following four components

Analysis and Visualization of Citation Networks Dangzhi Zhao, Andreas Strotmann, 2022-06-01 Citation analysis the exploration of reference patterns in the scholarly and scientific literature has long been applied in a number of social sciences to study research impact knowledge flows and knowledge networks It has important information science applications as well particularly in knowledge representation and in information retrieval Recent years have seen a burgeoning interest in citation analysis to help address research management or information service issues such as university rankings research evaluation or knowledge domain visualization This renewed and growing interest stems from significant improvements in the availability and accessibility of digital bibliographic data both citation and full text and of relevant computer technologies The former provides large amounts of data and the latter the necessary tools for researchers to conduct new types of large scale citation analysis even without special access to special data collections Exciting new developments are emerging this way in many aspects of citation analysis This book critically examines both theory and practical techniques of citation network analysis and visualization one of the two main types of citation analysis the other being evaluative citation analysis To set the context for its main theme the book begins with a discussion of the foundations of citation analysis in general including an overview of what can and what cannot be done with citation analysis Chapter 1 An in depth examination of the generally accepted steps and procedures for citation network analysis follows including the concepts and techniques that are associated with each step Chapter 2 Individual issues that are particularly important in citation network analysis are then scrutinized namely field delineation and data sources for citation analysis Chapter 3 disambiguation of names and references Chapter 4 and visualization of citation networks Chapter 5 Sufficient technical detail is provided in each chapter so the book can serve as a practical how to guide to conducting citation network analysis and visualization studies While the discussion of most of the topics in this book applies to all types of citation analysis the structure of the text and the details of procedures examples and tools covered here are geared to citation network analysis rather than evaluative citation analysis This conscious choice was based on the authors observation that compared to evaluative citation analysis citation network analysis has not been covered nearly as well by dedicated books despite the fact that it has not been subject to nearly as much severe criticism and has been substantially enriched in recent years with new theory and techniques from research areas such as network science social network analysis or information visualization Table of Contents Acknowledgment Dedications Foundations of Citation Analysis Conducting Citation Network Analysis Steps Concepts Techniques and Tools Field Delineation and Data Sources for Citation Analysis Disambiguation in Citation Network Analysis Visualization of Citation Networks Appendix 3 3 Appendix 5 4 2 Bibliography Author Biographies
