

Lab Report Format

Date:

Name:

Title

A whole page for a title is unnecessary and quite wasteful of paper. Put the title of your lab experiment at the top. Include your name, your group members' names, teacher's name, course and the date.

Purpose

Answer in a sentence or two, "what is the purpose of this experiment?"

Question

Write down a testable question, e.g. "How does string length affect the period of a pendulum?" or "What is the acceleration due to gravity in my school?" The general format is "how does *independent variable* affect *dependent variable*?"

Hypothesis

Use the format "If...then...because". E.g. "If the length of the string increases, then the period of the pendulum will increase because the object has to travel farther".

Experimental Design

What are you going to do in the experiment? Explain briefly, in a few sentences, what is the generalized procedure. State the independent, dependent and controlled variables.

Materials

List any and all materials you will need for the experiment (NOT the materials you needed to build your launcher). Use the proper name and include the number if you need multiples.

Scientific Drawing

Include a one-page scientific drawing of your apparatus that includes your projectile launcher, measuring devices, etc.

How to Design and Report Experiments Andy Field, Graham Hole, 2002-12-20 How to Design and Report Experiments is the perfect textbook and guide to the often bewildering world of experimental design and statistics It provides a complete map of the entire process beginning with how to get ideas about research how to refine your research question and the actual design of the experiment leading on to statistical procedure and assistance with writing up of results While many books look at the fundamentals of doing successful experiments and include good coverage of statistical techniques this book very importantly considers the process in chronological order with specific attention given to effective design in the context of likely methods needed and expected results Without full assessment of these aspects the experience and results may not end up being as positive as one might have hoped Ample coverage is then also provided of statistical data analysis a hazardous journey in itself and the reporting of findings with numerous examples and helpful tips of common downfalls throughout Combining light humour empathy with solid practical guidance to ensure a positive experience overall How to Design and Report Experiments will be essential reading for students in psychology and those in cognate disciplines with an experimental focus or content in research methods courses

Writing across Contexts Kathleen Blake Yancy, Liane Robertson, Kara Tacsak, 2014-04-15 Addressing how composers transfer both knowledge about and practices of writing Writing across Contexts explores the grounding theory behind a specific composition curriculum called Teaching for Transfer TFT and analyzes the efficacy of the approach Finding that TFT courses aid students in transfer in ways that other kinds of composition courses do not the authors demonstrate that the content of this curriculum including its reflective practice provides a unique set of resources for students to call on and repurpose for new writing tasks The authors provide a brief historical review give attention to current curricular efforts designed to promote such transfer and develop new insights into the role of prior knowledge in students ability to transfer writing knowledge and practice presenting three models of how students respond to and use new knowledge assemblage remix and critical incident A timely and significant contribution to the field Writing across Contexts will be of interest to graduate students composition scholars WAC and writing in the disciplines scholars and writing program administrators
