

REMOTE CONTROL PROCEDURES

CONTROLLING A DEVICE

This section explains how to set up the remote to control a device, such as a satellite TV receiver, a TV, a VCR, a cable TV box, a tuner, or an amplifier.

Note: The remote already is set up to control the receiver. But, if the receiver has its own volume control, then when you first install it, it is set up so that the remote cannot control the receiver's volume. If you want to set up the receiver so that the remote can control the receiver volume, see Receiver Volume Control on page 415.

1. Turn ON the device you want the remote to control, using the device's buttons or the remote control that came with the device.
2. Find the brand name of the device in the table that starts on page 12. If the brand is not listed, see Doing the Device Code Scan on page 420.

3. Press and hold the mode button for the device that you want the remote to control, for about three seconds. When all the other mode button backlights come on, release the mode button.

TV Mode Button

4. Use the number buttons to enter the code for the device.
Note: For the **ALICE** mode, you must enter a 4-digit code. The first digit is the code for the device, as follows:
0 is for a second TV, 1 is for a second VCR, and 2 is for an audio amplifier or cable TV box.

5. Press and release the **Power** button. If the code is valid, the mode button backlight blinks three times.

6. Test if the code works for the device by pressing the **Power** button. If the code works, the device should turn OFF.

7. Turn the device back ON and try some other buttons to make sure they work. Sometimes, the **Power** button may work when other buttons do not. If the code works for other buttons, stop here.
