*Curating Access* Amanda Cachia,2022-09-14 This book is an interdisciplinary collection of twenty four essays which critically examine contemporary exhibitions and artistic practices that focus on conceptual and creative aspects of access Oftentimes exhibitions tack on access once the artwork has already been executed and ready to be installed in the museum or gallery But what if the artists were to ponder access as an integral and critical part of their artwork Can access be creative and experimental And furthermore can the curator also fold access into their practice while working collaboratively with artists considering it as a theoretical and practical generative force that seeks to make an exhibition more engaging for a wider diversity of audiences This volume includes essays by a growing number of artists curators and scholars who ponder these ideas of ad hoc experimental and underground approaches within exhibition making and artistic practices It considers

how through these nascent exhibition models and art practices enhanced experiences of access in the museum can be a shared responsibility amongst museum workers curators and artists in tandem with the public so that access becomes a zone of intellectual and creative accommodation rather than strictly a discourse on policy The book provides innovative case studies which provide a template for how access might be implemented by individuals artists curators museum administrators and educators given the growing need to offer as many modalities of access as possible within cultural institutions This book shows that anyone can be a curator of access and demonstrates how to approach access in a way that goes beyond protocol and policy It will thus be of interest to students and scholars engaged in the study of museums art history and visual culture disability culture and communication

*The Flickering Mind* Todd Oppenheimer,2004-12-07 The Flickering Mind by National Magazine Award winner Todd Oppenheimer is a landmark account of the failure of technology to improve our schools and a call for renewed emphasis on what really works American education faces an unusual moment of crisis For decades our schools have been beaten down by a series of curriculum fads empty crusades for reform and stingy funding Now education and political leaders have offered their biggest and most expensive promise ever the miracle of computers and the Internet at a cost of approximately 70 billion just during the decade of the 1990s Computer technology has become so prevalent that it is transforming nearly every corner of the academic world from our efforts to close the gap between rich and poor to our hopes for school reform to our basic methods of developing the human imagination Technology is also recasting the relationships that schools strike with the business community changing public beliefs about the demands of tomorrow s working world and reframing the nation s systems for researching testing and evaluating achievement All this change has led to a culture of the flickering mind and a generation teetering between two possible futures In one youngsters have a chance to become confident masters of the tools of their day to better address the problems of tomorrow Alternatively they can become victims of commercial novelties and narrow measures of ability underscored by misplaced faith in standardized testing At this point America s students can t even make a fair choice They are an increasingly distracted lot Their ability to reason to listen to feel empathy is quite literally flickering Computers and their attendant technologies did not cause all these problems but they are quietly accelerating

them In this authoritative and impassioned account of the state of education in America Todd Oppenheimer shows why it does not have to be this way Oppenheimer visited dozens of schools nationwide public and private urban and rural to present the compelling tales that frame this book He consulted with experts read volumes of studies and came to strong and persuasive conclusions that the essentials of learning have been gradually forgotten and that they matter much more than the novelties of technology He argues that every time we computerize a science class or shut down a music program to pay for new hardware we lose sight of what our priority should be enlightened basics Broad in scope and investigative in treatment *The Flickering Mind* will not only contribute to a vital public conversation about what our schools can and should be it will define the debate

*The Possibility/Impossibility of a New Critical Language in Education* ,2010-01-01 The critique of Critical Pedagogy in its current various trends and paths teaches me not only the shortcomings of various versions of Critical Pedagogy No less important it offers an invitation to a reflection on the limitations costs and open horizons of critique itself It is an invitation to transcend critique as such But what alternative do we have and from where or with what ears might we listen to the music of the new call What is it that awaits us outside the critical tradition that in an unproblematic manner we could use internalize or surrender ourselves to Such questions reintroduce us to Utopia They reintroduce us to the Utopia of the possibility of happiness of the kind that is neither made possible nor advocated by self abandonment and enslavement destruction of the otherness of the Other and the I This book manifests a refusal to abandon Critical Theory s telos it offers no solutions victories of the oppressed and emancipation neither does it promise peace and unproblematic consensus On the contrary all the eternal open Diasporic individual can hope for is worthy Diasporic Love of Life creativity mature forms of togetherness and eternal nomadism as a manifestation of co poiesis
