Critical Financial Accounting Problems Ahmed Riahi-Belkaoui, 1998-02-12 From the complexity of today's business world and its daily transactions has come a proliferation of new accounting standards. The Financial Accounting Standards Board has weighed in with its own pronouncements on the issues but are they truly comprehensible and applicable? Riahi Belkaoui explores these questions clearly with numerous illustrations of the accounting techniques embedded in them and offers interpretations designed to help accounting professionals deal with these problems in their work. Scholars, researchers, and students in the academic community will also find his analyses helpful and compelling. *Multinational Corporations and Global Justice* Florian Wettstein, 2009-10-08 Multinational Corporations and Global Justice: Human Rights Obligations of a Quasi-Governmental Institution addresses the changing role and responsibilities of large multinational companies in the global political economy. This cross and inter-disciplinary work makes innovative connections between current debates and streams of thought, bringing together global justice, human rights, and corporate responsibility. Conceiving of corporate social responsibility (CSR) from this unique perspective, author Florian Wettstein takes readers well beyond the limitations of conventional notions which tend to focus on either beneficence or pure charity. While the call for multinationals' involvement in the solution of global problems has become stronger in recent times, few specifics have been laid down regarding how to hold those institutions accountable in the global arena. This text attempts to work out the normative basis underlying the responsibilities of multinational corporations, thereby filling a crucial void in the literature and marking a milestone in the CSR debate. *Global Problems, Global Solutions* JoAnn Chirico, 2024-03-08 A global look at social problems using the UN's 2030 Agenda for Sustainable Development as a framework. *Multinational Business Review*, 1996 **Managing International Business** Michael Wynn-Williams, 2025-03-06 The information age is fast leading to information overload as students of business are bombarded with new ideas from the internet and AI. Incorporating the lessons of history with the latest developments, this book reveals the secrets of the superstar managers. Teaching materials are available via the website autocognition.co.uk and the latest version of the textbook is for sale through the usual channels. **Efficiency of Investment Projects** Peter Brusov, Tatiana Filatova, 2025-09-30 Existing investment models fail to correctly assess the efficiency of investments. This happens due to both the lack of self-consistent models based on first principles and the inability to correctly assess the discount rate. This book describes innovative investment models tested in practice. The authors modify these models for real implementation conditions, including frequent payments of income tax and interest on debt at the end of periods and as advance payments and variable payments. The book examines how these types of payments influence the efficiency of investment projects. It considers the efficiency of an investment project from two perspectives: the owners of equity and debt and only the equity. The latest versions of two main theories of capital structure. Brusov, Filatova

Orekhova BFO and Modigliani Miller MM allow for the correct assessment of the discount rate when evaluating the efficiency of investment projects both long term and of arbitrary duration The book also describes the practical application of the created investment models and develops a new methodology for rating investment projects **Fundamentals of Corporate**
